	eResources addresses	
Example issues/ example questions/ tasks being completed	• Choose a real or hypothetical project and conduct a SWOT analysis (identifying strengths, weaknesses, opportunities, and threats). Based on the analysis, identify the main challenges that may arise during project execution and propose strategies to manage them. • Identify potential threats and opportunities that could impact the project's success. Determine the likelihood of each risk occurring and its potential impact. Based on this analysis, develop a risk management plan that includes risk minimization strategies and contingency plans. • Analyze various aspects of project team management, such as team formation, motivation of team members, conflict resolution, and building effective communication. Develop an action plan that allows for effective management of the project team to achieve the project's intended goals.
