

Subject card

Subject name and code	Marine mammals - biology and management - laboratory exercises, PG_00117729						
Field of study	Oceanography						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2025/2026		
Education level	Master's studies		Subject group		Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		1.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Prof. Krzysztof Skóra Hel Marine Station -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Iwona Pawliczka Vel Pawlik				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	10.0	0.0	0.0	10
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	10		6.0		10.0	26
Subject objectives	Introducing the selected research methods to study biology and ecology of marine mammals and practicing them. Introducing possible conflicts between human activity and marine mammal populations and implementing the effective methods to resolve them.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[OCEANMU2-K04] is ready to critically evaluate his/her knowledge and received content in the field of natural sciences in particular in the field of the studied specialty, a in problematic situations, supports oneself with knowledge experts		Student is able to critically analyze his/her own knowledge and external content regarding biology and conservation of marine mammals		[SK1] oral statement/conversation/discussion [SK5] implementation of a problem task [SK8] observation of student's independent or team work		
	[OCEANMU2-W01] knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish and a selected foreign language)		Student knows and understands in depth the specialist terminology specific to marine mammal research		[SW1] oral statement/conversation/discussion [SW5] implementation of a problem task		
	[OCEANMU2-W03] knows and understands research methods used in oceanography and related sciences		Student knows and understands the principles of using selected methods of population studies of marine mammals		[SW1] oral statement/conversation/discussion [SW5] implementation of a problem task		

Subject contents	1. Presentation and application of the technique of age determination of marine mammals based on tooth structure, using porpoises and seals as examples.		
	2. Presentation of the method of passive acoustic monitoring of the occurrence of harbour porpoises using porpoise recorders (PODs) and preliminary data analysis.		
	3. Conducting a conflict resolution process with stakeholders in marine wildlife conservation.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	attendance and own work of student	80.0%	100.0%
Recommended reading	Basic literature	Perrin, W.E., Myrick, A.C. (Eds). 1980. Age Determination of Toothed Whales and Sirenians. Rep.Int.Whal.Comm (Special Issue 3), Cambridge.
