

Subject card

Subject name and code	Seminar IV, PG_00117883						
Field of study	Oceanography						
Date of commencement of studies	October 2025		Academic year of realisation of subject			2026/2027	
Education level	Master's studies		Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study	
Mode of study	full-time studies		Mode of delivery			at the university	
Year of study	2		Language of instruction			Polish	
Semester of study	4		ECTS credits			5.0	
Learning profile	academic		Assessment form			credit	
Conducting unit	Department of Marine Ecosystems Functioning -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Katarzyna Smolarz				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	30.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		15.0		80.0	125
Subject objectives	Expanding knowledge regarding the protection and management of marine resources based on the analysis of specialized scientific literature. Acquiring the ability to analyze review and experimental works written in English. Developing and improving the ability to present one's own results and relate them to the latest knowledge.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OCEANMU2-W09] knows and understands legal regulations regarding intellectual property rights and their application in scientific work	knows and understands the basic legal regulations regarding intellectual property rights and their application in scientific work	[SW2] presentation/project/paper/report
	[OCEANMU2-U09] can take part in a discussion/debate using substantive arguments, has the ability to formulate opinions based on scientific knowledge and experience and creating synthetic summaries	is able to speak in a discussion/debate using substantive arguments, has the ability to formulate opinions based on scientific knowledge and experience and create synthetic summaries	[SU8] observation of student's independent or team work
	[OCEANMU2-U08] is able to prepare a study of a given issue/problem in Polish and a selected foreign language in written form (short scientific text, documented research work) and orally (paper, presentation) and discuss with specialists on topics related to oceanographic issues, with particular emphasis on the studied specialty	is able to prepare a study of a selected issue/problem in Polish and English in written (short scientific text, documented research work) and oral (paper, presentation) and discuss topics related to oceanographic issues with particular emphasis on the protection and management of sea resources	[SU2] presentation/project/paper/report
	[OCEANMU2-U05] is able to use source information in Polish and a selected foreign language, including archival and electronic databases, in the field of oceanographic issues, performs critical analysis and synthesis of information	is able to use source information in Polish and English, including archival and electronic databases, in the field of oceanographic issues, performs critical analysis and synthesis of information	[SU2] presentation/project/paper/report
	[OCEANMU2-K03] is ready to effectively organize his/her own work, is active and persistent and punctuality in completing tasks, is ready to carrying out evaluation of their own activities	is ready to effectively organize his/her own work, shows activity and is characterized by perseverance and punctuality in the implementation of tasks, is self-critical and draws conclusions based on self-analysis, acts in accordance with the principles of professional ethics	[SK2] presentation/project/paper/report
	[OCEANMU2-K04] is ready to critically evaluate his/her knowledge and received content in the field of natural sciences in particular in the field of the studied specialty, a in problematic situations, supports oneself with knowledge experts	is ready to critically assess the knowledge and content received in the field of natural sciences, in particular in the field of protection and management of sea resources, and in problematic situations, support himself with the knowledge of experts	[SK1] oral statement/conversation/discussion
	[OCEANMU2-W01] knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish and a selected foreign language)	knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish, English and/or Latin)	[SW2] presentation/project/paper/report
Subject contents	Getting acquainted with works published in international journals that make a significant contribution to the development of protection and management of marine resources. Developing the ability to properly present the obtained results.		
Prerequisites and co-requisites	Basic English		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	activity during classes	51.0%	10.0%
	oral presentation	50.0%	90.0%

Recommended reading	Basic literature	Literature required to pass the course: - review works in the field of protection and management of marine resources and methods used in this field - scientific publications recommended by the seminar instructor or master's thesis supervisor
	Supplementary literature	none
	eResources addresses	
Example issues/ example questions/ tasks being completed	none	
Work placement	Not applicable	

Document generated electronically. Does not require a seal or signature.
