

Subject card

Subject name and code	Non-native species in the marine environment - laboratory exercises, PG_00117892						
Field of study	Oceanography						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2026/2027		
Education level	Master's studies		Subject group		Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		2.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Laboratory of Ecophysiology and Bioenergetics -> Department of Marine Ecology -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. Monika Normant-Saremba				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		25.0		15.0	55
Subject objectives	Raising knowledge about alien species in marine ecosystems, with particular emphasis on the Baltic Sea.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OCEANMU2-K05] is ready to follow the rules occupational health and safety, taking care of the entrusted person specialized and recognition equipment emergency situations and take appropriate action activities	Is ready to comply with occupational health and safety rules and take care of the specialized equipment entrusted to him during research in the field of biology and ecology of alien species.	[SK8] observation of student's independent or team work
	[OCEANMU2-U02] can use scientific terminology fluently and appropriately in presenting and discussing problems in the field of oceanography	Is able to fluently and appropriately use scientific terminology in presenting and discussing problems related to alien species.	[SU1] oral statement/conversation/discussion
	[OCEANMU2-U04] is ready to develop in an analytical and synthetic way research and analysis results and based on them creating conclusions	Is able to analytically and synthetically prepare the results of research and analyzes in the field of biology and ecology of alien species and draw correct conclusions based on them.	[SU2] presentation/project/paper/report
	[OCEANMU2-U05] is able to use source information in Polish and a selected foreign language, including archival and electronic databases, in the field of oceanographic issues, performs critical analysis and synthesis of information	Is able to use source information in Polish and English, including archival and electronic databases, regarding issues related to the introduction of alien species into the marine environment, and performs critical analysis and synthesis of information.	[SU2] presentation/project/paper/report
	[OCEANMU2-K01] is ready to plan, implement and supervise, individually or collectively, next stages of the entrusted task, is ready to take responsibility for its results, cooperates effectively in the team and performs its functions in it various functions, including managerial ones	Is ready to plan, implement and supervise, individually or in a team, subsequent stages of research in the field of biology and ecology of alien species, feels responsibility for their results, cooperates effectively in a team, performing various functions, including being the leader.	[SK8] observation of student's independent or team work
Subject contents	Alien species in benthic communities occurring on submerged surfaces (macrofouling) in the coastal zone of the Gulf of Gdańsk.		
	Alien species from the list of the 100 most invasive species in the world occurring in the coastal zone of the Gulf of Gdańsk.		
	New alien species introduced to the Baltic Sea - origin, taxonomic features for identification, routes and vectors of introduction and secondary spread, biology and ecology, and potential impact on biodiversity and the human economy.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Worksheet/ report	51.0%	25.0%
	Presentation of results/discussion	51.0%	25.0%
	Practical work	51.0%	50.0%
