| Subject objectives                          | Understanding and mastering basic and specialized terminology in the field of offshore wind energy (OWF), as well as acquiring a basic understanding of the importance of offshore wind energy from an international, European, and national perspective. Gaining specialized knowledge of the law, including administrative instruments and administrative procedures for OWF, administrative decisions issued for the implementation of OWF related to the planning, construction, operation, and decommissioning of offshore wind farms, and the terms and conditions for granting support for electricity generated in offshore wind farms. |                                                          |                                                                                                                                                                    |                                     |                                                                                 |            |     |
