

Subject card

Subject name and code	Fundamentals of Business Intelligence, PG_00177476						
Field of study	Informatics and Econometrics						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2025/2026		
Education level	Master's studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		6.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Department of Business Informatics -> Faculty of Management -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Jacek Maślankowski				
	Teachers		dr Patrycja Krauze-Maślankowska				
			dr Jacek Maślankowski				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	45.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		4.0		86.0	150
Subject objectives	1. Familiarizing students with a comprehensive approach to designing data warehouses and Business Intelligence systems. 2. Preparing students to write scripts that manage data collected in Business Intelligence systems.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[liEMU2_W05] The student possesses advanced knowledge and understanding of informatics, statistics, and econometrics techniques and tools used to acquire, process, or visualise data to aid in decision-making and verify research hypotheses.	The student knows and understands the principles and evaluation criteria for reports applied in Business Intelligence.	[SW4] test/exam - oral or written
	[liEMU2_W09] The student possesses a comprehensive understanding of both traditional and modern entrepreneurship principles.	Understands the purpose of creating and using Business Intelligence systems and the mathematical, statistical and econometric methods used in them, e.g. data mining models.	[SW4] test/exam - oral or written
	[liEMU2_U12] The student can adapt, design, create, and operate IT systems that support business entities.	Is able to Design tabular, graphical and map reports based on database queries, creates queries for reporting systems – in SQL and MDX languages, manages the reporting server and automates the processes occurring in them.	[SU2] presentation/project/paper/report
	[liEMU2_U03] The student is able to obtain and verify data from properly selected sources and to collect, process, and visualize it using modern econometrics, informatics or statistics tools.	Is able to find appropriate data sources to solve a specific problem and critically evaluates the quality of that data.	[SU2] presentation/project/paper/report
Subject contents	LectureIntroduction to data warehouses and decision support systems.Data warehouse architecture.Data mining methods and OLAP systems.Data warehouse modeling data integration.Data warehouse implementation methodologies.Business Intelligence systems.Creating data models.Example of building a model.Data warehouse management.ExercisesCreating an operational database: advanced forms of select statements, transferring data sets.Implementing a multidimensional model: creating multidimensional tables, layering dimensions.Transferring data to a multidimensional model: designing the ETL process.Analytical and reporting tools: MS Reporting Services creating multidimensional reports and analyses.The essence of reporting services SQL Server Reporting Services, PowerBI, Apache SuperSet, implementation scenarios, installationPreparing reports planning the report project, downloading data, designing the layout, interactions and functionsData visualization charts, gauges, indicators, maps.RDL (Report Definition Language) XML tag syntax and description.Report server security and administration,		
Prerequisites and co-requisites	None		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exam - test	51.0%	50.0%
	Project	51.0%	50.0%
