

Subject card

Subject name and code	Language and Computers, PG_00177614						
Field of study	English Studies						
Date of commencement of studies	October 2024		Academic year of realisation of subject		2025/2026		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study Optional subject group		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		English		
Semester of study	3		ECTS credits		2.0		
Learning profile	academic		Assessment form		credit		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Marcin Fortuna				
	Teachers		dr Marcin Fortuna				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	The course aims to familiarize students with the ways in which computers are used in contemporary linguistics and with technologies that utilize natural language. Course content covers the fundamentals of computational linguistics, corpus linguistics, working with publicly available corpora, and discussing the principles of speech synthesizers. At the end of the course, participants will learn the basics of the Python programming language.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[FAL3_W07] Has advanced detailed knowledge of selected topics in the field of linguistics, including, in particular, research into the English language.	[FAL3_W07] Has advanced detailed knowledge of selected issues in the field of computational and corpus linguistics, in particular those related to research on the English language from a computational perspective.	[SW4] test/exam - oral or written
	[FAL3_U03] Applies tools of linguistic and literary analysis, formulates and solves complex analytical and interpretative problems concerning the English language, linguistics and English-language literatures, using linguistic and literary methodological and theoretical approaches.	[FAL3_U03] Is able to use corpus and computational linguistic analysis tools, formulate and solve complex analytical and interpretative problems concerning the English language, corpus and computational linguistics, using methodological and theoretical approaches in computational linguistics.	[SU4] test/exam - oral or written
	[FAL3_K01] Critically evaluates the extent of their knowledge and skills, in particular in the field of the English language, linguistics and English-language literature.	[FAL3_K01] Is ready to critically evaluate the scope of his/her knowledge and skills, in particular in the field of computational and corpus linguistics.	[SK4] test/exam - oral or written
	[FAL3_U05] Communicates in speech and writing in English and discusses issues related to linguistics and English literature, using the appropriate specialized terminology.	[FAL3_U05] Can communicate orally and in writing in English on topics related to computational and corpus linguistics, using appropriate specialist terminology.	[SU4] test/exam - oral or written [SU8] observation of student's independent or team work
	[FAL3_W05] He / she has advanced knowledge of the basic conceptual and terminological apparatus in the field of linguistics, including in particular those applicable in the study of the English language.	[FAL3_W05] Has advanced knowledge of the basic conceptual and terminological apparatus in the field of linguistics, in particular computational and corpus linguistics.	[SW4] test/exam - oral or written
Subject contents	- Computational Linguistics - Corpus Linguistics - Linguistic Databases - Speech Synthesis - Basics of Python Programming		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Teamwork	50.0%	10.0%
	Test	50.0%	90.0%
