	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		4.0		61.0	125
Subject objectives	Introducing students to the role of finance and banking, as well as the functioning of the financial system, with particular emphasis on banks.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[FiRL3_U04] The student is able—from the perspective of finance and accounting—to correctly select and properly apply methods and tools from the fields of management and quality sciences, economics, and finance to analyse and forecast economic processes and evaluate economic phenomena.	The student is able to choose and apply suitable methods for assessing financial phenomena in the areas of public finance and banking, such as credit risk evaluation and analysis of a bank's deposit products.	[SU2] presentation/project/paper/report
	[FiRL3_W02] The student has advanced knowledge and understanding of the functioning of the domestic and international financial market and financial instruments and institutions.	The student is able to identify financial system models along with the institutions and instruments of both market and public financial systems, and understands their goals, operational principles, and effects.	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report
	[FiRL3_W03] The student knows and understands, to an advanced degree - from the perspective of finance and accounting - the internal and external relations of institutions and organizations with particular emphasis on financial security systems.	The student demonstrates an understanding of the interrelations between the real and financial sectors, is aware of the complexity of interactions within the financial system, and acknowledges the importance of maintaining financial stability and security.	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report
	[FiRL3_U01] The student can analyze and interpret socio-economic processes and phenomena—from the finance and accounting perspective—using knowledge and tools from management, quality sciences, economics, and finance.	The student is able to analyze and interpret financial phenomena and their implications within both public and market financial systems, with a particular focus on banking operations.	[SU2] presentation/project/paper/report
