	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		4.0		86.0	150
Subject objectives	The aim of the course is to provide students with the knowledge and skills necessary to analyze, calculate, and interpret values and their changes within various components of financial statements and financial ratios, as well as to compare these values against economy-wide and industry-specific standards.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[FiRL3_U02] The student can identify, analyze or design adequate solutions to problems in finance and accounting.	The student detects financial anomalies and key trends in financial statements using methods such as comparative, ratio, and cash flow analysis, interprets these findings to diagnose financial problems, and recommends corrective actions or strategic decisions to improve enterprise performance.	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
	[FiRL3_U04] The student is able—from the perspective of finance and accounting—to correctly select and properly apply methods and tools from the fields of management and quality sciences, economics, and finance to analyse and forecast economic processes and evaluate economic phenomena.	The student is able—from the perspective of finance and accounting—to select and apply appropriate methods and tools from management, quality sciences, economics, and finance—including financial statement analysis, market and competition models, and risk management techniques—to analyze, evaluate, and forecast economic processes and business performance.	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
	[FiRL3_W08] The student has advanced knowledge and understanding of the interrelationship of accounting and finance with business in a changing environment and the accompanying contemporary challenges and dilemmas in this context.	The student can explain the purpose and users of financial statement analysis, describes key financial analysis methods (such as ratio, trend, and cash flow analysis), characterizes how financial information supports strategic decision-making in changing business environments, and identifies contemporary challenges in interpreting financial data and reports.	[SW4] test/exam - oral or written
	[FiRL3_W06] To an advanced degree, the student knows and understands the objectives, essence, nature and interrelationships of financial processes, ways of recording them, and the principles of rational decision-making and implementation of changes in this area.	The student explains the objectives, nature, and interrelations of financial processes within a company, understands methods of recording and presenting financial data in financial statements, and recognizes their role in rational financial decision-making and business performance evaluation.	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report
