Subject objectives	Acquiring knowledge about methods and techniques of business valuation.Gaining practical skills in applying selected methods of business valuation under specific conditions and environments.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[FiRMU2_W05] The student possesses a comprehensive understanding of advanced and innovative methods, tools, and techniques for obtaining, utilizing, and analyzing data needed to assess the financial situation of various entities in management, quality sciences, economics, and finance.	The student knows the principles of selecting appropriate valuation methods depending on external conditions, the set valuation objective, and the subject of valuation.	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report [SW5] implementation of a problem task
	[FiRMU2_W02] The student possesses a comprehensive understanding of the complexities and functions of both domestic and international financial markets, as well as financial instruments and institutions.	The student has advanced knowledge of the principles of the financial market and its institutions, knows and classifies financial instruments and concepts related to business valuation.	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report [SW5] implementation of a problem task
	[FiRMU2_U04] From a finance and accounting perspective, students are able to select and effectively use, adapt, or develop new methods and tools from the fields of management, quality sciences, and economics. They can analyze and forecast economic processes as well as evaluate economic phenomena.	The student is able to select appropriate valuation methods depending on the conditions of the environment, the established goal, and the object of valuation, and is capable of applying basic methods and computational techniques.	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written [SU5] implementation of a problem task
	[FiRMU2_U03] Students can gather data from carefully chosen sources to verify its accuracy. They can then use and present both financial and non-financial information to analyze and evaluate economic processes and phenomena in management and quality sciences, as well as in economics and finance.	The student acquires financial data from databases, both cross-sectional and time-series, and is able to use this data in the process of valuing companies.	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written [SU5] implementation of a problem task

Example issues/ example questions/ tasks being completed	1. Company X will grow at a rate of $g_1 = 2\%$ for the first six years, and then it will decrease its growth rate to $g_2 = 1\%$. How will this affect the valuation of the company's shares? The dividend in the last year was 4, and the expected rate of return $r = 11\%$. 2. Present the disadvantages, advantages, and purpose of using the replacement cost method.
