	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		0.0		0.0	60
Subject objectives	The subject is intended to provide students with an overview of the most commonly used design patterns related to object-oriented programming.As part of the course, students will learn the practical use of selected design patterns to solve typical programming problems.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[INFMU2_K02] is ready to work in a team and to lead a team, understands the necessity of systematic work on projects of long-term character, among other things is able to plan work in a group, is able to determine the priorities of work		The student is able to plan and design a computer program using design patterns		[SK2] presentation/project/paper/report		
	[INFMU2_W06] is well acquainted with the principles of health and safety in the IT profession		The student knows the principles of creating ergonomic computer applications using design patterns		[SW2] presentation/project/paper/report		
Subject contents	The history behind design patterns Overview of structural design patterns Overview of structural design patterns An overview of behavioural design patterns Selected architectural patterns						
Prerequisites and co-requisites	Familiarity with the basics of object-oriented programming in the student's chosen languages.						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	project presentation, observation of student work	51.0%	100.0%
