

Subject card

Subject name and code	Renewable Energy, PG_00081858						
Field of study	Chemistry						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	Bachelor's studies		Subject group		Optional subject group		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		2.0		
Learning profile	academic		Assessment form				
Conducting unit	Laboratory of Advanced Oxidation Processes -> Department of General and Inorganic Chemistry -> Faculty of Chemistry -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. Ewa Siedlecka				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		15.0	50
Subject objectives	to familiarize students with the energy situation in the country and the world to familiarize students with renewable energy sources and methods of obtaining it to familiarize students with types of biofuels, their production and use to familiarize students with pro-ecological vehicles and technical conditions for their use						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[CHEML3_W02] Describes the properties of elements and the most important chemical compounds, enumerates the methods of their preparation and methods of analysis.		classifies raw materials and appropriate technologies for the production of liquid and gaseous biofuels and methods of their storage,		[SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report		
	[CHEML3_W03] Explains the relationship between the structure of matter and its observed properties.		uses basic technological and chemical concepts describing the process of obtaining renewable energy, discusses the advantages and disadvantages of producing and using energy from renewable sources		[SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report		
	[CHEML3_K01] Identifies the level of her/his own knowledge and skills and the need for continuous learning and personal development.		understands the need to save energy and obtain it from renewable sources, understands the need for further education,		[SK1] oral statement/conversation/ discussion [SK2] presentation/project/paper/ report		
	[CHEML3_U08] Presents in an understandable way the basic facts about chemistry using a scientific language typical of chemical sciences.		understandably presents correct technological reasoning both orally and in writing,		[SU1] oral statement/conversation/ discussion [SU2] presentation/project/paper/ report		

Subject contents	Characteristics of renewable energy sources. Conditions of energy policy in the 21st century - forecasts for the future. Discussion of methods of obtaining solar, wind, geothermal and tidal energy. Heat pumps. Photovoltaic cells. Solar collectors. Windmills. Biomass energy resources. Energy plants - raw material for energy production, liquid and gaseous biofuels. Characteristics and technologies of gaseous and liquid biofuel production. Utilization and management of waste generated during biofuel production. Hydrogen as the fuel of the future. Algae as a source of biofuels. Fuel and microbiological cells. Pro-ecological vehicles: electric vehicles, using solar energy, hybrid combustion-electric vehicles. Energy storage. Technical preparation for the use of pro-ecological vehicles.		
Prerequisites and co-requisites	non		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	carrying out the work assigned by the teacher	51.0%	70.0%
	activity during classes	51.0%	30.0%
Recommended reading	Basic literature	given by the teacher during the class	
	Supplementary literature	independently searched by the student	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed			
Work placement	Not applicable		

Document generated electronically. Does not require a seal or signature.
