

Subject card

Subject name and code	Decisions in international relations, PG_00179117						
Field of study	Criminology						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2025/2026		
Education level	Bachelor's studies		Subject group				
Mode of study	full-time studies		Mode of delivery		e-learning		
Year of study	1		Language of instruction		Polish Polish		
Semester of study	1		ECTS credits		2.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Faculty of Social Sciences -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Agnieszka Bógdał-Brzezińska, prof. UG				
	Teachers		dr hab. Agnieszka Bógdał-Brzezińska, prof. UG				
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	Familiarizing students with the procedures and conditions of decision-making processes undertaken by various participants in international relations. Explaining the differences between a procedure and a decision-making process. Explaining the differences between administrative and political decisions. Explaining the differences between procedures within international economic relations involving transnational corporations and decision-making processes at the interstate level in international organizations and integration communities. Indicating the specificity of decision-making processes in international relations involving individuals, institutions, states, and international organizations.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
		- the student is able to: recognize and name international decision-making processes - relate international decision-making processes to the theories learned - distinguish between decision-making centers: national and international - identify the role of an individual as an international decision-maker, explain who an international official is - present decision-making mechanisms in international decision-making collectives as groups (groupthink) - recognize decision-making procedures in international corporations, international organizations	[SW5] implementation of a problem task [SU1] oral statement/conversation/discussion [SK1] oral statement/conversation/discussion [SK5] implementation of a problem task
Subject contents	I. The essence of the decision a. Praxeological. Projection of The Fog of War document and discussion - what this course is for. b. Ontologically. Decision (event) or deciding (process) - that is, how to define an object. Man or institution, individual or group - how to define a decision-maker. c. Epistemological. Strictly or humanistically - that is, the place of the problem of decision making in the spectrum of sciences. Descriptive or prescriptive - that is, whether the function of decision-making theory is to indicate what it is or should be like. Paradigmatic or idiosyncratic - that is, how useful theories of MS science are in explaining and understanding decision-making, and what alternatives are there. d. Analytically. Structure or agent, micro or macro - that is, with overt and hidden effects of selecting the level of analysis for decision making research. Statistics and models or case studies - i.e. the results of formal, quantitative and qualitative methods in the analysis of decision making. II. Unit deciding a. Rational approaches. Nominal features of rational thinking and choice in the rational actor model (RAM). Categories of utility and expected utility and their maximization; bayesianism. Application of RAM: game theories - categories of Nash equilibrium, Pareto allocation efficiency; sequential games - theory of movements; strategic interaction (Schiller). b. Cognitive views. Limited rationality (Simon) - maximization versus satisfaction. Psychology and neurobiology and the decision-making properties of the human body; consistency of judgments, attitude to risk, cognitive complexity and contra-current thinking, memory and analogical thinking (Khong), psychophysical condition and emotions and decision-making abilities. The analysis of individual decisions: the rules of selecting the objects of analysis, content analysis and (de) coding (Hermann, George) and psychobiography (Barber, Post). Heuristics and cognitive errors. c. Hybrid shots. Cybernetic Theory (Steinbrunner); prediction theory (Tversky, Kahnemann); polyheuristic theory (Minz, Geva). III. Group decision making a. Structures of small decision-making groups, the role of a leader and others (e.g. mind guard, devil's advocate, delegate), selected techniques for managing the decision-making process in a small group (e.g. leadership style, group composition, agenda control, problem formatting, manipulation of information). Dynamics of small decision groups - groupthink (Janis) and newgroup (Stern) syndromes, their manifestations and consequences for decision making. A group in crisis decision making. Comparison of the way a small internal, international and supranational group is decided (EU casus). IV. Institutional decision making a. Bureaucratic. The role of bureaucracy in making decisions. Institutional Identity: Essentialization, "Homosexual Reproduction" and "Cohort Effects". Properties of vertical decision-making processes from problematization to implementation - inertia, logic of appropriateness and standard operating procedure (SOP). Information flow channels. Inter-bureaucratic rivalry - the so-called turf wars. The decision as a result. b. Cultural. Understanding culture in the context of decision-making analysis: as a closed system of meanings and as a source of preferences, valuations, heuristics and ready-made decision schemes. Historical, cultural and ideological narratives about one's own international role and decision making. Cultural dimensions (Hofstede) and regularities in a given population in the sphere of decision making. Examples of the influence of cultural idiosyncrasies on the differences in decision-making methods. c. Internal versus international and supranational. Two-level game (Putnam) and multi-level management (Marx). Multidimensional taxonomies of participants - techniques for scaling their importance for decision making. Role of political parties and pressure groups, media (CNN effect and decision-making), civil society and other internal, international and transnational actors. On the iceberg: official structures and decision-making practice in the European Union - intra- and interinstitutional (Commission procedures, co-decision, comitology).
