University of Gdańsk

Subject card

Subject name and code	Basics of Historical Statistic and Demographics, PG_00183776		
Field of study	Sightseeing and Historical Tourism		
Date of commencement of studies	October 2026	Academic year of realisation of subject	2028/2029
Education level	Bachelor's studies	Subject group	Obligatory subject group in the field of study
Mode of study	full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	Polish
Semester of study	5	ECTS credits	2.0
Learning profile	academic	Assessment form	credit
Conducting unit			
Name and surname of lecturer (lecturers)	Subject supervisor	dr Radosław Kubus	
	Teachers		

Lesson types

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	0.0	30.0	0.0	0.0	0.0	30

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	2.0	18.0	50

Subject objectives

To acquaint students with the practical dimension of social quantitative research. To provide a basis for critical reflection on the usefulness of research tools and the data obtained from their application

Learning outcomes

Course outcome	Subject outcome	Method of verification
[KiTHL3_W04] Knows and understands basic research methods, the tools of the historian's trade, and the principles of critical analysis and interpretation of historical sources used in research on the past	Students will be acquaint with basic concepts and statistical methods used in historical research, such as data analysis, sampling, correlation, extrapolation and interpolation.	[SW4] test/exam - oral or written [SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report
[KiTHL3_U01] Is able to select sources correctly, subject them to critical analysis and interpretation, and apply research methods appropriate to the historian's workshop	The student has an in-depth knowledge of the methods and problems of research in statistics and historical demography and knows how to apply these methods in historical analysis.	[SU1] oral statement/conversation/ discussion [SU2] presentation/project/paper/ report [SU4] test/exam - oral or written
[KiTHL3_K01] Critically evaluates the knowledge possessed, demonstrates readiness to constantly expand it and seek expert opinions in the event of difficulties with solving the problem on their own	The student is acquaint with the main problems and challenges of statistical and demographic research in history, such as lack of complete data, changes in political boundaries, differences in census methodology in different historical periods. At the same time, he/she is able to solve methodological problems effectively thanks to his/her knowledge of the titles of leading journals, the professional literature on the subject and familiarisation with the names and achievements of the most important researchers from the country and the world involved in quantitative research in history.	[SK1] oral statement/conversation/ discussion [SK2] presentation/project/paper/ report [SK4] test/exam - oral or written

Subject contents	Sources for statistical-historical research. Difficulties and benefits of using statistical sources in history. Statistical estimation; Sources of demographic statistics from the 16th to the early 19th century (state censuses, treasury sources, church censuses); Preferences in the choice of statistical methods. Development of statistical material; Measures of central tendency classical and positional averages; Measures of dispersion and measures of asymmetry; Types of chronological series; Absolute and relative growth, indices of dynamics; Methods of studying the state and natural movement of the population (population structure by sex, age and marital status, family reconstruction method); Population relations (population density, urbanisation process, natural population movement).
Prerequisites and co-requisites	

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Presentation	51.0%	10.0%
Activity during the classes	51.0%	10.0%
Test	51.0%	80.0%

eResources addresses	

Example issues/ example questions/ tasks being completed	Point out the dangers of using past state censuses in statistical research. Outline the difficulties arising from the use of statistical sources. Characterize the information contained in old-Polish metric books of baptisms, weddings and funerals, and suggest the formulation of research problems which can be undertaken on the basis of this type of source.
