Subject contents	The course introduces students to product management topics including lean, MVP and user story mapping. Students will learn how to talk to customers, developers and architects, how to work remotely, how not to fall into the traps of data driven development. The class will include mini-workshops: on Design Thinking, on managing a mature product backlog, and an introduction to UX. Students will also be introduced to examples of running natural language processing products. Students will be introduced to methods that should be used when recognizing and dealing with bad decisions in product management.		
Prerequisites and co-requisites	Choice of the specialisation Natural Language Processing		

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	project	51.0%	60.0%
	discussion	51.0%	40.0%
