

Subject card

Subject name and code	Proseminar, PG_00178066						
Field of study	Informatics and Econometrics						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Bachelor's studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			1.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Department of Business Informatics -> Faculty of Management -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Dorota Buchnowska				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	The purpose of the course is to prepare students to write a thesis and conduct related research, as well as to analyze and present the results of this research.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[liEL3_U01] The student can analyze and interpret social and economic processes and phenomena using knowledge and econometrics, informatics or statistics tools from management and quality sciences, economics and finance.	The student is able to identify research problems and to select and apply appropriate techniques, methods, and tools for specific research or project objectives.	[SU3] text preparation/written work
	[liEL3_W01] The student knows and understands to an advanced degree the nature and evolution of theories in management, quality sciences, economics, and finance, along with their place in the social sciences system —especially in applying informatics or statistics tools.	The student identifies and describes the basic components of a scientific article and provides correct examples of their use.	[SW3] text preparation/written work
	[liEL3_K01] The student is prepared to acquire the knowledge necessary to tackle cognitive and practical problems, particularly in econometrics, informatics and statistics. Additionally, the students are ready to assess their current knowledge and the information they receive critically and consult with experts if they have difficulties solving the problem independently.	The student is prepared to acquire knowledge independently in order to solve selected research problems and achieve defined project goals. The student is prepared to critically evaluate their own knowledge and to search for reliable and relevant sources of information appropriate to the problem.	[SK3] text preparation/written work
	[liEL3_U10] The student can convey information clearly and effectively, presenting their opinions using econometrics, informatics, and statistics terminology across various media.	The student is able to clearly and logically present observed research problems in a selected area, indicate and justify appropriate methods and tools to solve them, and argue for the relevance of proposed solutions. The student is able to develop a thesis plan (research or project-based) appropriate to the defined objective of the work.	[SU3] text preparation/written work
Subject contents	<ol style="list-style-type: none"> 1. Requirements for diploma theses at the Faculty of Management 2. Rules for evaluation of diploma theses 3. Structure of the diploma thesis 4. Methods and research tools 5. Stages of the research procedure 6. Collection and analysis of scientific literature - use of databases 7. Rules for using and citing scientific publications and other sources 		
Prerequisites and co-requisites	Knowledge of basic methods and tools in the field of computer science and econometrics.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Analysis of the structure of a scientific article and its critical evaluation according to specified guidelines.	51.0%	20.0%
	Concept of the diploma thesis	51.0%	80.0%
