

Subject card

Subject name and code	Sustainable Computerization of Busines, PG_00178734						
Field of study	Informatics and Econometrics						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	Master's studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	part-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			5.0		
Learning profile	academic	Assessment form			credit		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Bartłomiej Gawin				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	8.0	24.0	0.0	0.0	0.0	32
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	32		2.0		91.0	125
Subject objectives	Mastering skills that support IT project management, as well as the implementation of tasks in projects involving the implementation of applications and IT systems in correlation with the company's business goals and processes and taking into account the architectural order and sustainable development of the organization.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[liEMU2_U06] Students can utilize structured and detailed knowledge of management, quality sciences, economics, and finance to address dilemmas and develop innovative solutions for complex or unusual problems that arise in professional settings.		The student knows and understands advanced theoretical and practical design issues in the field of economic informatics, necessary for the sustainable design of information systems.			[SU2] presentation/project/paper/report	
	[liEMU2_W01] The student possesses a profound understanding of the nature and evolution of theories in management, quality sciences, economics, and finance. They know these fields' significance within the broader social sciences. Additionally, the student learns the main trends in developing informatics and statistics tools.		The student is able to design IT systems for enterprises using advanced design techniques and taking into account the flexibility of these systems for the sustainable computerization of the organization.			[SW2] presentation/project/paper/report	

Subject contents	<p>A. Lecture topics</p> <p>Discussion of the definition, principles and architectural framework of enterprise architecture Discussion of tools for managing the enterprise architecture of an organization Discussion of the TOGAF methodology for managing enterprise architecture Discussion of the issues of sustainable development and digitalization of an organization Discussion of issues regarding processes and tools supporting the management of energy efficiency of an enterprise Discussion of issues regarding the design of IT systems in UML notation</p> <p>B. Exercise topics</p> <p>Practical presentation and application in exercises of the ADOit tool Practical presentation and application in exercises of the EA tool Practical presentation and application in exercises of methodologies and tools for designing IT systems supporting the sustainable development of an enterprise</p>		
Prerequisites and co-requisites	Basic knowledge of mathematics and computer science.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	work project	50.0%	100.0%
Recommended reading	Basic literature	Gawin B., Systemy informatyczne w zarządzaniu procesami workflow, PWN 2015 Sobczak A., Architektura korporacyjna. Aspekty teoretyczne i wybrane zastosowania praktyczne, Ośrodek studiów nad cyfrowym państwem 2013 BOC: electronic materials on IT architecture management in ADOit	
	Supplementary literature	Informatyka ekonomiczna, pod red. S. Wrycza., J. Maślankowski, Wydawnictwo Naukowe PWN, Warszawa 2019	
	eResources addresses		
Example issues/ example questions/ tasks being completed	Design an enterprise IT architecture model for the selected enterprise in the ADOIT tool.		
Work placement	Not applicable
