	[liEMU2_U12] The student can adapt, design, create, and operate IT systems that support business entities.		The student is able to design business processes that support the functioning of economic entities.		[SU2] presentation/project/paper/report		
	[liEMU2_U01] The student can creatively and profoundly analyze complex social and economic processes using structured knowledge, econometrics, informatics, or statistics tools.		The student is able to analyze and interpret complex and multidimensional business processes in an in-depth and creative way using structured knowledge and IT tools.		[SU2] presentation/project/paper/report		
	[liEMU2_U11] The student can collaborate effectively in teams and assume leadership roles.		The student is able to cooperate and work in process teams, direct their design work or take a leading role in them.		[SU2] presentation/project/paper/report		
	[liEMU2_W06] The student possesses a structured understanding of the processes, methods, and tools necessary for the design, creation, development, and provision of suitable conditions for informatics, econometrics or statistics tools.		The student has structured and theoretically based knowledge of business processes, tools and techniques for their design, parameterization, simulation and analysis.		[SW2] presentation/project/paper/report		

Subject contents	<p>A. Lecture topics</p> <p>Discussion of the basics of business process management  Discussion of design notations for modeling business processes and decision rules  Discussion of tools for designing, simulating, and analyzing business processes  Discussion of tools for designing, simulating, and analyzing decision rules in business processes</p> <p>B. Exercise topics</p> <p>Practical presentation and application of the Adonis tool in exercise work</p>		
Prerequisites and co-requisites	<p>Prerequisites: Economic informatics, databases  Additional requirements:</p> <p>Basic knowledge of organizational management</p>
