

Subject card

Subject name and code	Master Seminar 2, PG_00177508						
Field of study	Informatics and Econometrics						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			2.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Department of Statistics -> Faculty of Management -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Ewa Wycinka				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	30.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	Acquiring the ability to identify key scientific sources related to the thesis topic. Developing the ability to critically analyze literature and integrate information from various sources. Preparing the theoretical part of the thesis as a foundation for the conducted empirical research.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[[iEMU2_W05] The student possesses advanced knowledge and understanding of informatics, statistics, and econometrics techniques and tools used to acquire, process, or visualise data to aid in decision-making and verify research hypotheses.	The student conducts a literature review on the tools and analytical methods selected for the empirical part of the thesis and knows examples of the application of these methods.	[SW3] text preparation/written work
	[[iEMU2_K01] The student is ready to acquire and deepen the knowledge needed to solve cognitive and practical problems, in particular in the field of econometrics, informatics or statistics, as well as to evaluate the knowledge and the received content critically and to consult experts in the event of difficulties with solving the problem on their own.	The student verifies sources, assesses their credibility and usefulness – also using bibliometric tools and databases.	[SK3] text preparation/written work
	[[iEMU2_U02] Students can use conventional or innovative statistics, econometrics or informatics tools to analyze economic and social phenomena.	The student selects research tools and techniques, including statistical programs and packages, to analyze research problems.	[SU3] text preparation/written work
	[[iEMU2_U03] The student is able to obtain and verify data from properly selected sources and to collect, process, and visualize it using modern econometrics, informatics or statistics tools.	The student has the ability to search for literature and use scientific databases, applying criteria for selecting literature: currency, reliability of the source, and relevance to the research problem	[SU3] text preparation/written work
	[[iEMU2_U07] Students can prepare detailed written papers, presentations, and oral speeches on econometrics, informatics, or statistics issues.	The student prepares the theoretical chapters of the thesis as a logical introduction to the empirical part.	[SU3] text preparation/written work
	[[iEMU2_U13] The student can formulate and verify hypotheses about simple research problems using advanced, structured knowledge and appropriately selected research methods in econometrics, informatics, or statistics.	The student conducts a critical analysis and synthesis of knowledge from various studies and formulates their own interpretation.	[SU3] text preparation/written work
Subject contents	Continuation of the seminar, which covers the application of data analysis methods to economic and social issues. Critical analysis of the subject literature. Comparative analysis of approaches, research results, and tools used in the literature. Synthesizing knowledge from various studies and formulating one's own interpretation. Preparation of the theoretical part of the thesis as a logical introduction to the empirical part.		
Prerequisites and co-requisites	Formulated thesis topic, objective, and work plan. Literature review conducted.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Preparation of the theoretical part of the thesis.	51.0%	100.0%
Recommended reading	Basic literature	Literature used by the student to write the thesis, verified by the thesis supervisor.
