Subject objectives	Familiarizing students with the phenomenon of sustainable well-being in the workplace from a practical, workshop perspective, consisting in understanding the meaning of this phenomenon, recognizing, selecting and applying measurement tools and methods of intervention that support achieving a state of well-being, so as to combine professional and personal well-being. As part of the course, students will prepare to design and evaluate their own well-being programs. They will participate in the integration of knowledge, presentation of projects and planning the transfer of skills to real organizations.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[ZARZMU2_W04] The student possesses a deep understanding of human behavior, including individual, group, and organizational dynamics within an organization.	The student explains the concepts and ideas in the field of work ergonomics, the importance and impact of well-being in the workplace and the balance between professional and personal well-being.	[SW4] test/exam - oral or written
	[ZARZMU2_U06] Students can utilize and integrate structured, detailed knowledge of management, quality sciences, economics, and finance to address dilemmas and formulate solutions, including innovative ones, to complex or atypical management problems that arise in professional settings.	The student, based on the knowledge acquired during classes, designs and evaluates his/her own well-being programmes.	[SU2] presentation/project/paper/report
	[ZARZMU2_U09] The student can independently plan and implement the learning process, improve professional skills in lifelong management, and guide others in this area.	The student applies methods that allow him to shape his duties and the way of performing work to better suit his needs and preferences in order to increase commitment, satisfaction and a sense of meaning in work	[SU2] presentation/project/paper/report
	[ZARZMU2_W08] The student possesses a deep understanding of management processes, including their objectives, specificity, complexity, and how they relate to other organizational processes, alongside the challenges and dilemmas presented by a dynamically changing environment.	The student identifies and defines personal conditions and threats in business, their connections with stress and burnout, and explains the meaning and essence of positive business, as well as appropriate work culture, including the spiritual climate and just culture.	[SW2] presentation/project/paper/report
[ZARZMU2_U05] The student can identify and correctly apply legal, professional, and ethical standards in business decision-making.	The student uses appropriate, proven methods of coping with stress and mindfulness techniques, and also uses job crafting to build engagement and meaning in the workplace.	[SU2] presentation/project/paper/report
