	[ZARZMU2_W06] The student possesses a thorough understanding of the principles of rational decision-making related to individual resources, functional areas within the organization, processes, and management levels. This understanding is based on a well-structured and theory-supported foundation in management, quality sciences, economics, and finance.	The student identifies principles and makes appropriate choices in terms of methods of procedure and adequate organisational arrangements when designing a payroll system and setting up an employee appraisal system.	[SW4] test/exam - oral or written
	[ZARZMU2_U05] The student can identify and correctly apply legal, professional, and ethical standards in business decision-making.	The student independently obtains and analyses data and then uses it to design and implement systems: reward and appraisal of employees.	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report
	[ZARZMU2_U06] Students can utilize and integrate structured, detailed knowledge of management, quality sciences, economics, and finance to address dilemmas and formulate solutions, including innovative ones, to complex or atypical management problems that arise in professional settings.	The student identifies and analyses problems concerning the creation of an employee remuneration system at various stages and the implementation of an employee appraisal system and, on this basis, makes rational decisions about the actions to be taken in order to increase the likelihood of achieving organisational goals.	[SU1] oral statement/conversation/discussion [SU2] presentation/project/paper/report
