University of Gdańsk

Subject card

Subject name and code	Programming basics for biologists, PG_00189398						
Field of study	Biology						
Date of commencement of studies	October 2025		Academic year of realisation of subject	2025/2026			
Education level	Master's studies		Subject group	Obligatory subject group in the field of study Optional subject group			
Mode of study	full-time studies		Mode of delivery	at the university			
Year of study	1		Language of instruction	Polish			
Semester of study	2		ECTS credits	2.0			
Learning profile	academic		Assessment form	credit			
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Marcin Jąkalski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours	Self-study	SUM	
	Number of study hours	30		5.0	15.0	50	
Subject objectives	- The course introduces the basics of programming and biological data analysis to biology students, by utilization of Linux, the Bash shell, and the R language. - Students work with biological data and learn how to load, process, filter the data, perform basic statistical analysis, and how to visualize it.						

Learning outcomes

Course outcome	Subject outcome	Method of verification
[BIOLMU2_U01] the graduate is able to select and apply research techniques and tools appropriate to the problems of the biological sciences specialisation studied	the graduate is able to select and apply research techniques and tools appropriate to the problems of the biological sciences specialisation studied	[SU1] oral statement/conversation/ discussion
[BIOLMU2_K03] the graduate is ready to identify priorities in order to accomplish a task defined by him/herself or by others	the graduate is ready to identify priorities in order to accomplish a task defined by him/herself or by others	[SK1] oral statement/conversation/ discussion [SK8] observation of student's independent or team work
[BIOLMU2_U03] the graduate can critically analyse and select biological information, especially from electronic sources	the graduate can critically analyse and select biological information, especially from electronic sources	[SU5] implementation of a problem task [SU8] observation of student's independent or team work
[BIOLMU2_U08] the graduate is able to present research work in the field of the selected specialisation of biological sciences using verbal communication means and multimedia	the graduate is able to present research work in the field of the selected specialisation of biological sciences using verbal	[SU1] oral statement/conversation/ discussion [SU5] implementation of a problem task
[BIOLMU2_W03] the graduate has an in-depth knowledge and understanding of research problems at the frontiers of biological sciences that require the use of advanced tools	the graduate has an in-depth knowledge and understanding of research problems at the frontiers of biological sciences that require the use of advanced tools	[SW1] oral statement/ conversation/discussion [SW5] implementation of a problem task
[BIOLMU2_W06] the graduate is familiar with advanced statistical tools relevant to the problems of the biological sciences specialisation studied	the graduate is familiar with advanced statistical tools relevant to the problems of the biological sciences specialisation studied	[SW1] oral statement/ conversation/discussion [SW5] implementation of a problem task
[BIOLMU2_W07] the graduate is familiar with specialised bioinformatics tools, useful in solving problems of the studied specialisation of biological sciences	the graduate is familiar with specialised bioinformatics tools, useful in solving problems of the studied specialisation of biological sciences	[SW1] oral statement/ conversation/discussion [SW5] implementation of a problem task

Subject contents

1. Linux basics

2. Working with the terminal, Bash commands and scripts

3. Introduction to R and RStudio

4. Data types, variable declaration, functions

5. Loading biological data, data structure, working with files

6. Descriptive statistics, basic statistical tests

7. Basics of biological data visualization in R

8. Creating documents/reports with R Markdown

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
completing assignments	51.0%	40.0%
completing worksheets	51.0%	60.0%
