

**Subject card**

<b>Subject name and code</b>	International and EU Climate change law , PG_00072798						
<b>Field of study</b>	Environmental Law and Sustainable Development						
<b>Date of commencement of studies</b>	October 2026	<b>Academic year of realisation of subject</b>			2027/2028		
<b>Education level</b>	Master's studies	<b>Subject group</b>			Obligatory subject group in the field of study		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	2	<b>Language of instruction</b>			English		
<b>Semester of study</b>	4	<b>ECTS credits</b>			3.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>			exam		
<b>Conducting unit</b>	Department of Public Economic Law and Environmental Protection Law -> Faculty of Law and Administration -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr hab. Maciej Nyka				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	30		2.0		30.0	62
<b>Subject objectives</b>	The aim of the course is to present to students the issues of climate protection in the law and policy of the European Union						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[ELSDMU2_W07] Student has a structured knowledge of the types of legal relations and the regularities that govern them	has a structured knowledge of the type of legal relations relating to legal climate protection and the regularities governing these relations	[SW1] oral statement/ conversation/discussion
	[ELSDMU2_W02] The graduate knows and understands to an in-depth degree - selected facts, objects and phenomena as well as methods and theories related to them explaining the complex relationships between them, constituting advanced general knowledge in the field of scientific or artistic disciplines forming the theoretical foundations, structured and theoretically based knowledge covering key issues and selected issues in the field of advanced detailed knowledge - appropriate for the curriculum of the field of Environmental Law and Sustainable Development. The graduate knows and understands the main trends in the development of scientific or artistic disciplines relevant to the curriculum.	The graduate knows and understands to an in-depth degree - selected facts, objects and phenomena related to the European climate law and the methods and theories related to them explaining the complex relationships between them, constituting advanced general knowledge in the field of scientific or artistic disciplines forming the theoretical foundations, structured and theoretically based knowledge covering key issues and selected issues in the field of advanced detailed knowledge - specific to the program education in the field of Environmental Law and Sustainable Development. The graduate knows and understands the main development trends in scientific or artistic disciplines relevant to the curriculum	[SW2] presentation/project/paper/ report
	[ELSDMU2_K02] The graduate is ready to responsibly perform professional roles, taking into account the changing social needs, including: - developing the achievements of the profession, - maintaining the ethos of the profession, - observing and developing the principles of professional ethics and acting for the observance of these principles	The graduate is ready to responsibly perform professional roles, taking into account the changing social needs, in particular those relating to the issues of legal aspects of climate change, including: - developing the achievements of the profession, - upholding the ethos of the profession, - observing and developing the principles of professional ethics and acting for the observance of these principles	[SK2] presentation/project/paper/ report
	[ELSDMU2_W03] The graduate knows and understands the fundamental dilemmas of modern civilization. The graduate knows and understands the economic, legal and other conditions of various types of activities related to the awarded qualification, including the principles of industrial property protection and copyright.	The graduate knows and understands the fundamental dilemmas of modern civilization related to climate protection. The graduate knows and understands the economic, legal and other conditions of various types of activities related to the awarded qualification, including the principles of industrial property protection and copyright law	[SW1] oral statement/ conversation/discussion
	[ELSDMU2_U01] The graduate is able to independently plan and implement his/her own lifelong learning and guide others in this area.	The graduate is able to independently plan and implement their own lifelong learning in the area of climate protection law	[SU1] oral statement/conversation/ discussion
	[ELSDMU2_U07] Student is able to use and integrate theoretical knowledge in the field of law and related scientific disciplines in order to analyze and interpret complex legal problems	can use and integrate theoretical knowledge in the field of law and related scientific disciplines in order to analyse and interpret complex legal problems in the area of climate change protection and adaptation in EU law	[SU1] oral statement/conversation/ discussion
	[ELSDMU2_W04] Graduates understand principles and rules referring to using the environment, environmental regulation of economic activity and legal instruments which introduce those rules and principles.	Graduates understand the rules and regulations concerning the use of the environment, the environmental regulation of economic activity and the legal and climatic conditions of this regulation of the use of the environment	[SW2] presentation/project/paper/ report
