University of Gdańsk

Subject card

Subject name and code	Non-invasive methods of seabed surveys - lecture, PG_00191392		
Field of study	Geology		
Date of commencement of studies	October 2026	Academic year of realisation of subject	2028/2029
Education level	Bachelor's studies	Subject group	Obligatory subject group in the field of study Subject group related to scientific research in the field of study
Mode of study	full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	Polish
Semester of study	6	ECTS credits	3.0
Learning profile	academic	Assessment form	credit
Conducting unit	Department of Geophysics -> Faculty of Oceanography and Geography -> Rector		
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. Jarosław Tęgowski	
	Teachers		

Lesson types

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	40.0	0.0	0.0	0.0	0.0	40

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	40	1.0	34.0	75

Subject objectives

Acquire the ability to analyse echograms and determine geological facies from them.

Learning outcomes

Course outcome	Subject outcome	Method of verification
[GEOLL3_U04] is able to use specialized computer software and mathematical and statistical methods in the analysis of geological data	is able to use dedicated computer software in analysis of data obtained by seabed surveying methods	[SU8] observation of student's independent or team work
[GEOLL3_W04] knows and understands phenomena and processes occurring in the past and today in the interior of the Earth and on its surface, defines the methods of how to study them	defines non-invasive methods of seabed exploration	[SW3] text preparation/written work
[GEOLL3_U06] is able to identify geological objects and combine them with geological processes and anthropogenic environmental transformations	Is able to identify geological objects in hydroacoustic recordings hydroacoustic recordings	[SU8] observation of student's independent or team work
[GEOLL3_W02] knows and understands the terminology appropriate in science and natural sciences	knows and understands the terminology specific to non-invasive methods of seabed surveying	[SW3] text preparation/written work
[GEOLL3_W03] knows and identifies paleontological, mineralogical, petrographic and structural objects using appropriate methods	knows and identifies structures in the structure of the seabed using appropriate methods	[SW3] text preparation/written work

<table>
<tr><td>Subject contents</td><td>Reflection and scattering of acoustic signals from the seabed.
Practical interpretation of seabed echograms recorded with low-frequency hydroacoustic equipment; determination of seismostratigraphic units.
Analysis of bathymetric maps recorded with multibeam echosounders, analysis of sonar images of the seabed, learning the principles of mapping
sediment mapping from sonar recordings.
Planning and design of non-invasive bottom surveys.</td></tr>
<tr><td>Prerequisites and co-requisites</td><td></td></tr>
<tr><td>Assessment methods and criteria</td><td><table><tr><th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr><tr><td>colloquium, observation</td><td>51.0%</td><td>100.0%</td></tr></table></td></tr>
