

Subject card

Subject name and code	Sozological determinants of spatial management, PG_00195594						
Field of study	Spatial Management						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			2.0		
Learning profile	academic	Assessment form			exam		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Mariusz Kistowski				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	20.0	0.0	0.0	0.0	40
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	40		5.0		5.0	50
Subject objectives	<p>1 To be familiar with natural and anthropogenic changes in the environment.2. knowledge of forms of environmental protection.3. to identify and discuss the conditions determining the quality of human life.4.To become familiar with procedures and documents in the field of shaping and protecting natural resources, environment, landscape and space. AcquiringThe student will acquire the ability to analyse the state of the environment and to develop environmental protection guidelines. 5.5 To master the terminology of the environmental determinants of the quality of life and its application.</p>						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GPMU2_K02] is ready to solve cognitive and practical problems in the field of economic and social geography based on acquired knowledge in cooperation with various entities, including representatives of local government units	is willing to solve practical and theoretical problems in the field of geography in the broad sense of the term in connection with various subjects (local government units)	[SK5] implementation of a problem task
	[GPMU2_K03] is ready to initiate and organise activities for the benefit of society and environmental protection of the region, country and Europe in cooperation with various entities and authorities at various levels	is willing to initiate and organise projects for the benefit of the public and for the protection of the natural environment of the region, the country or Europe in cooperation with local authorities	[SK2] presentation/project/paper/report
	[GPMU2_U01] formulates and solves complex and unusual problems of spatial management and proposes their innovative solutions, taking into account the unpredictability of spatial processes	The student is able to identify and analyse, formulate and solve complex and non-standard spatial management problems; suggest new, innovative solutions in a way that takes into account evolving spatial processes.	[SU2] presentation/project/paper/report [SU5] implementation of a problem task
	[GPMU2_U02] properly selects sources and information derived from them, with particular regard to sources of spatial information, evaluates them critically and interprets them creatively	Be able to select sources and information, including spatial information sources, and to evaluate and interpret them	[SU2] presentation/project/paper/report [SU5] implementation of a problem task
	[GPMU2_U05] formulates and tests hypotheses regarding determinants (natural, social, economic, cultural, legal) of spatial management	Be able to attempt to formulate theses and hypotheses and then verify and test them in relation to spatial management conditions (in natural, social, economic, legal or cultural terms).	[SU2] presentation/project/paper/report [SU5] implementation of a problem task
[GPMU2_W03] understands to a deeper extent, the conditions (natural, social, economic, cultural, legal) of processes taking place in spatial management, with particular emphasis on the specifics of Polish maritime areas and voivodships of northern Poland	in an advanced and in-depth study of the processes and phenomena and conditions (natural, social, economic, cultural and legal) occurring in the spatial economy, taking into account the specific location of the coastal region	[SW1] oral statement/conversation/discussion [SW2] presentation/project/paper/report	
Subject contents	Programme content A. Problems of the lecture: A.1. Terminology, importance in contemporary processes of human environment development. A.2 Formal and legal aspects of environment protection. A.3 Assessment of the state of the environment and the degree of its degradation. Comfort versus quality of human life. A.4 Counteracting degradation - methods and possibilities. Indications for shaping and protecting the environment. B. Problems of exercises: B.1 Hazard identification. Negative and positive changes in the environment; B.2. Assessment of anthropogenic impact on the environment and its influence on the quality of human life.		
Prerequisites and co-requisites	knowledge of the structure of the geographical environment, understanding of the interaction between the components of the environment and human activities; knowledge of and ability to synthesise information from several sources; identification of anthropogenic factors and impacts, and verification and assessment of the impact of different impacts		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exam	51.0%	50.0%
	Credit work	51.0%	50.0%
