| Subject name and code | Nature conservation programs and methods, PG_00198139 | | | | | | |
| Field of study | Natural Resources Conservation | | | | | | |
| Date of commencement of studies | October 2026 | | Academic year of realisation of subject | | | 2028/2029 | |
| Education level | Bachelor's studies | | Subject group | | | Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study | |
| Mode of study | full-time studies | | Mode of delivery | | | at the university | |
| Year of study | 3 | | Language of instruction | | | Polish | |
| Semester of study | 6 | | ECTS credits | | | 3.0 | |
| Learning profile | academic | | Assessment form | | | credit | |
| Conducting unit | Laboratory of Geobotanics and Nature Conservation -> Department of Plant Taxonomy and Nature Conservation -> Faculty of Biology -> Rector | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | | dr hab. Piotr Rutkowski | | | | |
| | Teachers | | | | | | |
| Lesson types | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
| | Number of study hours | 0.0 | 30.0 | 0.0 | 0.0 | 0.0 | 30 |
| | E-learning hours included: 0.0 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | | Participation in consultation hours | | Self-study | SUM |
| | Number of study hours | 30 | | 6.0 | | 39.0 | 75 |
| Subject objectives | To understand the problems and present practical solutions for nature and environmental protection. To learn about nature conservation programmes implemented at national and global level. To become familiar with practical forms and methods of nature conservation directly under field conditions. To become familiar with methods of active nature conservation in situ and ex situ. To understand the causes and directions of environmental degradation and to know how to protect components of inanimate nature. | | | | | | |

| | | | |
|--|--|---|---|
| Learning outcomes | Course outcome | Subject outcome | Method of verification |
| | [OZPL3_W09] The graduate possesses an advanced comprehension of the current state of knowledge and the latest trends in protection of natural resources, as well as their relationship to other natural disciplines | The graduate explains the relationship between the achievements of the natural sciences and the possibilities of their use in socio-economic life, taking into account the sustainable use of biodiversity | [SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report [SW3] text preparation/written work [SW5] implementation of a problem task |
| | [OZPL3_W07] The graduate has an advanced understanding of the methods and means of nature and environmental protection, including nature monitoring | The graduate introduces methods and ways to protect nature and the environment at national and global level, including nature monitoring | [SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report [SW3] text preparation/written work [SW5] implementation of a problem task |
| | [OZPL3_U03] The graduate is able to search for and use available sources of biological information, including electronic sources, and critically analyse them | The graduate searches for and uses available sources of biological information, including electronic sources, and critically analyses them | [SU1] oral statement/conversation/ discussion [SU2] presentation/project/paper/ report [SU3] text preparation/written work [SU5] implementation of a problem task [SU8] observation of student's independent or team work |
| | [OZPL3_K05] The graduate is ready to understand the need to improve their own competences, update their knowledge and improve their skills | The graduate understands the need to improve his/her own competences and to update knowledge and improve skills | [SK1] oral statement/conversation/ discussion [SK2] presentation/project/paper/ report [SK3] text preparation/written work [SK5] implementation of a problem task [SK8] observation of student's independent or team work |
| | [OZPL3_K08] The graduate is ready to systematically update his/her natural knowledge and to apply it in practice | The graduate systematically updates his/her natural science knowledge and knows its practical applications | [SK1] oral statement/conversation/ discussion [SK2] presentation/project/paper/ report [SK3] text preparation/written work [SK5] implementation of a problem task [SK8] observation of student's independent or team work |
| [OZPL3_U07] The graduate is able to draw correct conclusions on the basis of analysis and synthesis of data from various sources | The graduate draws correct conclusions based on analysis and synthesis of data from a variety of sources | [SU1] oral statement/conversation/ discussion [SU2] presentation/project/paper/ report [SU3] text preparation/written work [SU5] implementation of a problem task [SU8] observation of student's independent or team work | |
| Subject contents | Types of protected areas in Poland against a background of similar legal solutions in other countries of Europe and the world. The application of particular types of protected areas for the protection of natural habitats, ecosystems, species, landscapes, local natural peculiarities, hydrological, geomorphological and geological values. European Ecological Network Natura 2000 (international and national legislation). Agri-environmental programmes. The role of NGO's in nature conservation. Methods of active nature conservation in situ and ex situ. Forms of in situ active conservation measures - introduction, reintroduction, assisting species reproduction in natural sites. Conservation of the species' habitat. Renaturalisation and restoration of the species' habitat. Restoration of green spaces. Tree and avenue protection methods. Designation, protection and maintenance of migration corridors. Protection of valuable inanimate nature sites. Forms of ex situ active nature conservation measures. Conservation cultivation and breeding. The role and tasks of gene banks. Nature conservation law as a practical tool for nature conservation. | | |
