Subject objectives	The aim of the course is to familiarize students with the regularities , processes and theoretical basis of economic relations . Students learn about the most important models useful in the interpretation of international economic relations . They will learn how to interpret processes taking place between countries on the trade and capital levels . On the basis of theory and learned regularities , they will be able to critically and independently assess the nature of these relationships and their evolution . They will understand the consequences of the growing openness of the economy .
