

Subject card

Subject name and code	Trends in Development of Logistics, PG_00199366						
Field of study	Economics						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			3.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Department of Transport Economics -> Faculty of Economics -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Aleksandra Koźlak				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	15.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		45.0	75
Subject objectives	The aim of the subject is to introduce students to problems of the development directions of logistics activities - both the service offers, changes in the in the infrastructure, point infrastructure equipment, means of transport, as well as the logistical processes.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[EKONMU2_U06] can practically apply various forms and range of acquired knowledge in economics, finance and management, supplementing it with an independent critical analysis of its efficiency and usefulness	E2_U06 The student has the ability to use in practice various forms and scope of acquired knowledge in economics, finance and management to analyse conditions and effects of applying new technological and organisational solutions in logistics	[SU2] presentation/project/paper/report [SU5] implementation of a problem task
	[EKONMU2_K02] is aware of the level of their knowledge in the area of solving complex problems in economic; understands the need to extend and update this knowledge throughout his/her life	E2_K02 The student is aware of the level of his/her knowledge in the field of economics and logistics and understands the need to deepen and update this knowledge throughout life.	[SK1] oral statement/conversation/discussion [SK5] implementation of a problem task [SK8] observation of student's independent or team work
	[EKONMU2_K01] recognises the importance of knowledge in the field of economics in the process of identifying and solving economic problems and of consulting experts when having difficulties in solving them independently	E2_K01 The student recognises the importance of knowledge of economics in the process of identifying and solving logistic problems and of consulting experts in case of difficulties in solving them independently	[SK2] presentation/project/paper/report
	[EKONMU2_W08] has an in-depth knowledge of processes occurring in enterprises and economic organisations and with related areas, as well as of processes of change in public institutions; knows methods of research on the regularities governing these changes, taking into account the influence of external stakeholders on them	E2_W08 The student has in-depth knowledge of the economic, social and ecological changes in logistic activity	[SW2] presentation/project/paper/report [SW5] implementation of a problem task
	[EKONMU2_W04] has an in-depth knowledge of different types of economic and social ties and regularities governing them; has an in-depth knowledge of economic and financial ties between enterprises	E2_W04 The student knows the different types of economic and social ties, processes, phenomena, entities, structures and institutions affecting the development of the sector transport-freight forwarding-logistics sector	[SW2] presentation/project/paper/report [SW5] implementation of a problem task
[EKONMU2_U02] can use acquired knowledge to describe and analyse the causes and course of economic and social processes and phenomena, and can formulate his/her own opinions and critically select data and analysis methods based on the achievements of economic and social sciences	E2_U02 The student is able to use his/her knowledge to analyse the causes and course of processes and phenomena occurring in the logistics industry and is able to select data and methods to analyse these processes and phenomena	[SU2] presentation/project/paper/report	
Subject contents	<p>1. Socio-economic megatrends determining the directions of logistics development 2. Development of logistics infrastructure 3. Development problems in transport 4. The "greening" of transport and logistics 5. Using modern technologies in logistical processes 6. Development trends in city logistics</p> <p>Any doubts regarding the issues discussed during classes can be discussed during consultations.</p>		
Prerequisites and co-requisites	Basic knowledge of logistics and the ability to critically analyse the socio-economic environment that influences the evolution of logistics activities		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		51.0%	10.0%
		51.0%	20.0%
		51.0%	50.0%
		51.0%	20.0%
