

Subject card

Subject name and code	Environmental Impact Assessment, PG_00199740						
Field of study	Business and Environmental Technology						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			2.0		
Learning profile	academic	Assessment form			credit		
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Małgorzata Szymańska-Brałkowska				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	15.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		20.0	50
Subject objectives	<p>Main aim: Presenting the procedures for environmental impact assessment.</p> <p>Specific aims: Legal principles of environmental protection and environmental impact assessment. Origin and nature of the environmental impact assessment procedure. Strategic procedure, environmental impact assessment of projects, Assessment of the impact of projects on Natura 2000 areas.</p>						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[BiTEMU2_W09] predicts the effects of human interference in the natural environment and analyzes the impact of human activity on the quality of the environment on a local, regional and global scale	The student analyses and explains the impact of human activities on environment at local and global scales. Student lists ways to counteract environmental threats.	[SW4] test/exam - oral or written
	[BiTEMU2_W01] provides an in-depth analysis of the relationship between economics and environmental technology, and their place within the social and natural sciences.	The student lists and explains the links between pro-environmental measures. The student analyses the social aspects of EIA.	[SW4] test/exam - oral or written
	[BiTEMU2_K04] by participating in the preparation of economic and social projects, he understands the need to reconcile legal, economic, ecological, political and social requirements; has the ability to plan own development, work in teams, take responsibility for actions and formulate opinions.	The student explains and lists the economic and ecological aspects of environmental impact assessment. The student analyses the interdisciplinarity of the environmental impact assessment procedure in economic, ecological and social contexts.	[SK1] oral statement/conversation/discussion
	[BiTEMU2_W02] distinguishes legal and administrative mechanisms and procedures in environmental protection and interprets it in depth manner	The student analyses the complexity of the mechanism of the environmental impact assessment procedure in the context of environmental issues.	[SW1] oral statement/conversation/discussion
Subject contents	<p>Course content</p> <p>A. The content of the lectures:</p> <ol style="list-style-type: none"> 1. The principles of environmental protection and the assessment of influences upon the environment. 2. Origin and the nature of the proceedings in the assessment of influences upon the environment. 3. The proceedings in the assessment of influences upon the environment (the strategic procedure, the assessment of influences of projects upon the environment and on Natura 2000 areas). 4. The proceedings in the assessment of influences upon the environment (transboundary impact). 5. The decision on environmental conditions (proceedings for issuing a decision, parties, deadlines). 6. Public participation in the procedure. 7. The methods and tools (such as; screening, scoping, checklists, preparing variants, Leopold matrix). 		
Prerequisites and co-requisites	The basics of environmental protection, the basic concepts of the environmental protection law.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		51.0%	100.0%
