|--|---|--|--|-------------------------------------|---|-----------------------------------|-----|
| Subject name and code | Marine and Inland Fisheries - lecture, PG_00201228 | | | | | | |
| Field of study | Aquaculture – Business And Technology | | | | | | |
| Date of commencement of studies | October 2026 | Academic year of realisation of subject | | | 2026/2027 | | |
| Education level | Bachelor's studies | Subject group | | | Obligatory subject group in the field of study Subject group related to practical vocational preparation | | |
| Mode of study | full-time studies | Mode of delivery | | | at the university | | |
| Year of study | 1 | Language of instruction | | | Polish | | |
| Semester of study | 1 | ECTS credits | | | 1.0 | | |
| Learning profile | practical | Assessment form | | | credit | | |
| Conducting unit | Laboratory of Aquaculture -> Department of Marine Biology and Biotechnology -> Faculty of Oceanography and Geography -> Rector | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | | dr Ligia Panasiak | | | | |
| | Teachers | | | | | | |
| Lesson types | Lesson type | Lecture | Tutorial | Laboratory | Project | Seminar | SUM |
| | Number of study hours | 15.0 | 0.0 | 0.0 | 0.0 | 0.0 | 15 |
| | E-learning hours included: 0.0 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in didactic classes included in study plan | | Participation in consultation hours | | Self-study | SUM |
| | Number of study hours | 15 | | 1.0 | | 9.0 | 25 |
| Subject objectives | Introducing students to the environmental conditions of seas and estuaries (including basic ecology principles), fishing methods in marine and estuarine waters, marine fish production, inland fisheries, including fishing gear used in inland waters. Presenting to students the characteristics of fish production in inland and marine waters, conducting hydrological research of waters, and their potential use in fish production. | | | | | | |
| Learning outcomes | Course outcome | | Subject outcome | | | Method of verification | |
| | [AKWAL3_W01] has an advanced understanding of the links between achievements in selected fields of science and natural science disciplines, and their potential applications in socio-economic life | | Students are familiar with and understand the connections between the achievements of selected natural science disciplines and their potential applications in analyzing and managing marine and inland fisheries. | | | [SW4] test/exam - oral or written | |
| | [AKWAL3_W03] has an advanced understanding of the conceptual categories and terminology related to the biological basis of aquatic organisms breeding, as well as concepts directly relevant to the practical applications of this knowledge | | Students are familiar with and understand the conceptual categories and terminology of marine and inland fisheries. | | | [SW4] test/exam - oral or written | |
| | [AKWAL3_W06] has an advanced understanding of techniques, research methods and tools used in aquaculture | | Student are acquainted with and discusses the techniques, research methods, and tools used in marine and inland fisheries. | | | [SW4] test/exam - oral or written | |

| Subject contents | <p>1. Environmental conditions in seas and estuaries.</p> <p>2. Fishing methods for marine waters and estuaries.</p> <p>3. Marine fishery production.</p> <p>4. Inland fishery.</p> <p>5. Types of lakes in Poland in relation to fishery and methods of their management.</p> <p>6. Fishery tools and equipment used for inland waters.</p> | | | | | | | | | | | |
|---|--|--|--|--------------------------|-------------------|-------------------------------|---|-------|-------|------|-------|-------|
| Prerequisites and co-requisites | Basic understanding of fish biology and ecology | | | | | | | | | | | |
| Assessment methods and criteria | <table border="1"> <thead> <tr> <th data-bbox="456 622 794 651">Subject passing criteria</th> <th data-bbox="799 622 1137 651">Passing threshold</th> <th data-bbox="1142 622 1481 651">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 658 794 710">Activity in classes - engagement in discussions</td> <td data-bbox="799 658 1137 710">51.0%</td> <td data-bbox="1142 658 1481 710">25.0%</td> </tr> <tr> <td data-bbox="456 716 794 745">Test</td> <td data-bbox="799 716 1137 745">51.0%</td> <td data-bbox="1142 716 1481 745">75.0%</td> </tr> </tbody> </table> | | | Subject passing criteria | Passing threshold | Percentage of the final grade | Activity in classes - engagement in discussions | 51.0% | 25.0% | Test | 51.0% | 75.0% |
| Subject passing criteria | Passing threshold | Percentage of the final grade | | | | | | | | | | |
| Activity in classes - engagement in discussions | 51.0% | 25.0% | | | | | | | | | | |
| Test | 51.0% | 75.0% | | | | | | | | | | |

| Example issues/ example questions/ tasks being completed | <ol style="list-style-type: none"> 1. Fish production conditions in inland waters and population density, 2. Reproduction, mortality, age structure, population development of fish, lifespan, and growth rate, 3. Population movement, production, species interactions, fish feeding habits, impact of fishing on fish populations, 4. Overview of aquatic organisms produced in aquaculture, 5. Inland water fisheries (basic principles and elements of management, lake, river, and reservoir fisheries, pond culture, major species caught in Poland, concept of sustainable fisheries), 6. Basics of salmonid aquaculture (history, production technology, characteristics of trout farming facilities, major salmonid species produced alongside rainbow trout), 7. Basics of carp farming (Cyprinus carpio) (history, technology, characteristics of carp farming facilities, other species produced in polyculture with carp), 8. Fish and invertebrate mariculture (history, major species produced, production methods, and scale), 9. Importance of limnology and hydrometeorology in fisheries, 10. Importance of potamology and krenology in fisheries, 11. Stocking and fish conservation, 12. Biomanipulation as a fishery tool for lake restoration, 13. List and briefly describe tools used in marine and inland fisheries for catching aquatic organisms. | |
