

Subject card

Subject name and code	Bioindication and Biomonitoring of Water - laboratory classes, PG_00201437						
Field of study	Water Management and Protection of Water Resources						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study Subject group related to practical vocational preparation		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		1.0		
Learning profile	practical		Assessment form		credit		
Conducting unit	Laboratory of Biodiversity and Benthic Functioning -> Department of Marine Ecology -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Halina Kendzierska				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	15	1.0	9.0	25		
Subject objectives	Development of knowledge on the assessment of threats to aquatic ecosystems related to human activities, the search for solutions aiming at sustainable management of aquatic areas and the improvement of the quality of aquatic ecosystems. To learn about and be able to select methods for the biological assessment of aquatic environmental quality and sustainability.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[GWOZWL3-U03] The student has the ability observe and describe the changes taking place in water management and predict further directions of its development as well as conduct a critical analysis of case studies of problems of water management and protection of water resources in terms of impact on ecological, social and economic systems; natural valorization and assessment of quality of the environment.		Can carry out a critical analysis of threats to water resources using a biological assessment of the quality of the water environment.		[SU8] observation of student's independent or team work		
	[GWOZWL3-U02] The student can select and independently apply basic research techniques and tools, with adhering to established analytical procedures in the field of environmental research in water management, adequately to the considered research problem.		Can select basic research techniques and tools, following established analytical procedures for water biomonitoring.		[SU2] presentation/project/paper/report [SU3] text preparation/written work		
Subject contents	Assessment of the quality of a selected aquatic biotope based on environmental and laboratory studies; Laboratory studies including identification of selected protected species and alien species.						

Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	activity in class, being prepared for class	51.0%	10.0%
	assesstment works, reports	51.0%	70.0%
	poster presentation of scientific paper	51.0%	20.0%
