

**Subject card**

<b>Subject name and code</b>	Emergency Management - laboratory classes, PG_00201458						
<b>Field of study</b>	Water Management and Protection of Water Resources						
<b>Date of commencement of studies</b>	October 2026	<b>Academic year of realisation of subject</b>			2028/2029		
<b>Education level</b>	Bachelor's studies	<b>Subject group</b>			Obligatory subject group in the field of study Subject group related to practical vocational preparation		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	3	<b>Language of instruction</b>			Polish		
<b>Semester of study</b>	6	<b>ECTS credits</b>			1.0		
<b>Learning profile</b>	practical	<b>Assessment form</b>			credit		
<b>Conducting unit</b>	Department of Hydrology -> Faculty of Oceanography and Geography -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr Robert Sudenis				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	15		1.0		9.0	25
<b>Subject objectives</b>	Ability to understand the content and procedures of emergency management. Ability to analyze and understand and recognize the main causes of specific emergencies and basic crisis problems caused by natural disasters, especially floods . Preparation and participation in a game simulating the activities of the services during an emergency situation (flood/landslide/whirlwind, etc.). This course prepares the student to independently analyze the basic problems of crisis management, threat assessment and response of state institutions.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GWOZWL3-K05] The student has the ability take responsibility for the safety of their own work and that of others, dealing with emergencies, exercising caution in the laboratory and in the field, responsibility for entrusted equipment and apparatus.	K_K05 - He is ready to take responsibility for independently made decisions, fulfill duties for the public interest related to responding to threats	[SK8] observation of student's independent or team work
	[GWOZWL3-U04] The student can distinguish between objectives, analyze and evaluate modern strategies for managing environment especially in the context of ecosystem approach to managing human activities in the environment with taking into account relevant law regulations and the indication of administrative bodies responsible for the management of waters and the protection of water resources.	K_U04- the ability to formulate the objective, analysis, and evaluation of the management of crisis situations, the ability to apply relevant legislation, and determine the role and tasks of the services and administrative bodies	[SU2] presentation/project/paper/report
	[GWOZWL3-U03] The student has the ability observe and describe the changes taking place in water management and predict further directions of its development as well as conduct a critical analysis of case studies of problems of water management and protection of water resources in terms of impact on ecological, social and economic systems; natural valorization and assessment of quality of the environment.	K_U03 - ability to observe and describe potential hazards and critically analyze the problems of the impact of hazards on ecological, social, and economic systems based on case studies	[SU2] presentation/project/paper/report
	[GWOZWL3-K08] The student knows and understands engage in professional work in preparation or implementation of projects for the benefit of society.	K_K08 - is ready to plan, design, and implement activities (including projects) during hazards for the benefit of society	[SK8] observation of student's independent or team work
	[GWOZWL3-U16] The student is able to demonstrate creativity in working independently and in team, taking on a variety of roles, including a leadership role.	K_U16- ability to work as a team and lead a group through planning and proper organization of work during emergencies, and cooperation between different types of services	[SU2] presentation/project/paper/report
	[GWOZWL3-W03] The student has an advanced knowledge and understanding of the organisation and legal framework of environmental protection, nature conservation and water management, as well as the principles governing the organisation and operation of hydrological and meteorological services and the fundamentals of Integrated Environmental Monitoring.	K_W03 - knowledge and understanding of the crisis management system in the Republic of Poland with legal acts, knowledge and understanding of the functioning of individual services within the crisis management system	[SW2] presentation/project/paper/report
Subject contents	<p>1. Analysis of the crisis management plan at the provincial level 2. Analysis of forecasting and warning of natural disasters  3. Simulation game of a selected crisis situation 4. Familiarization with the work of crisis management centers at the provincial level</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	student's activity during classes	51.0%	20.0%
	completion of a credit work/project	51.0%	80.0%
