

Subject card

Subject name and code	Economic Geography - field classes, PG_00201978						
Field of study	Geography						
Date of commencement of studies	October 2026		Academic year of realisation of subject			2027/2028	
Education level	Bachelor's studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	full-time studies		Mode of delivery			at the university	
Year of study	2		Language of instruction			Polish	
Semester of study	4		ECTS credits			2.0	
Learning profile	academic		Assessment form			credit	
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Renata Anisiewicz				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	24.0	0.0	0.0	0.0	24
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	24		2.0		24.0	50
Subject objectives	Learning about economic geography research methods and developing skills in their practical application in the field; the ability to observe and correctly prepare field materials and sketches and use topographic maps; the ability to independently correct materials and process them statistically and cartographically in the form of descriptive and graphic documentation						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[GEOGRL3-U09] is able to work in a group and take on various roles within it, look after the equipment entrusted to them, and ensure their own safety and that of others.	is able to work as part of a team in the field and take on various roles within it; takes care of the equipment entrusted to them and ensures their own safety and that of others	[SU8] observation of student's independent or team work
	[GEOGRL3-U04] can apply field and laboratory methods and research tools, spatial analysis methods, and methods of presenting research results in the field of geography, assess their usefulness for tasks in which the application goal of geography can be realized	is able to apply research methods and tools in the field of economic geography, including field observations and measurements, and assess their suitability for carrying out tasks in which the application goal of geography can be achieved	[SU6] demonstration of practical skills
	[GEOGRL3-U03] can plan and conduct, independently and as part of a team, simple research in the field of geography under the supervision of a scientific advisor, based on the necessary information from professional literature and other sources	is able to plan simple research procedure in the field of socio-economic geography independently and in a team	[SU6] demonstration of practical skills [SU8] observation of student's independent or team work
	[GEOGRL3-W03] knows and understands on advanced level social, economic, and political diversity in the world, as well as the social, economic, and political characteristics of countries and regions, especially northern Poland and the Pomeranian Province; understanding of socio-economic changes taking place in the modern world	based on field research characterizes the phenomena and processes taking place in the socio-economic space of the Pomeranian Voivodeship	[SW1] oral statement/ conversation/discussion
Subject contents	Variant A: Study of the development of services in the city (based on the example of Gdynia)		
	1. Classification of basic services 2. Analysys of the spatial distribution of service points 3. Identifying the places where basic services are concentrated 4. Characteristics of the service structure Variant B: Diversification of land use forms in the city center (based on the example of Gdańsk) 1. Characteristics of various forms of urban investment 2. Study of the spatial structure of investment form 3. Determining the functional structure of the center's areas Variant C: Studying the intensity of socio-economic phenomena in the surrounding space 1. Inventory of the volume of movement characterizing the phenomenon at various time and spatial scales 2. Determining the spatial differentiation of the intensity of the studied phenomenon 3. Characteristics of the structure of differentiation of the studied phenomenon		
Prerequisites and co-requisites	lack		

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	observation of the student`s independent work	51.0%	20.0%
	oral statement, conversation, discussion	51.0%	10.0%
	demonstration of practical skills	51.0%	70.0%
