

Subject card

Subject name and code	Supporting sensory functions, PG_00202487						
Field of study	Special Pedagogy						
Date of commencement of studies	October 2026	Academic year of realisation of subject				2030/2031	
Education level	uniform Master's studies	Subject group				Obligatory subject group in the field of study Optional subject group	
Mode of study	full-time studies	Mode of delivery				at the university	
Year of study	5	Language of instruction				Polish	
Semester of study	9	ECTS credits				1.0	
Learning profile	academic	Assessment form				credit	
Conducting unit							
Name and surname of lecturer (lecturers)	Subject supervisor		dr Karolina Tersa				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		5.0		5.0	25
Subject objectives	nie dotyczy						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[E.1WW.K.2] is ready to use the acquired knowledge to analyze pedagogical events	is ready to use his knowledge to analyze the sensory difficulties of young children	[SK1] oral statement/conversation/discussion
	[E.1WW.U.2] Is able to analyze the psychological and pedagogical foundations of early child development support and early therapeutic intervention, the basics of neuropsychology, developmental psychology, including prenatal psychology; determine the etiopathogenesis of developmental disorders and abnormalities; analyze the clinical psychology and psychopathology of a young child; determine the development factors and the educational environment of a young child, disability and the risk of disability and types of disabilities in children; determine and analyze neurodevelopmental disorders, cerebral palsy, autism spectrum disorders, ADHD and language disorders; determine and analyze emotional and behavioral disorders in children; apply psychohygiene, prevention and early recognition of developmental disorders; plan the care and upbringing of a young child; plan psychoeducation and psychopedagogical support for parents and guardians of a child with developmental risks; plan and implement training in upbringing skills; use play and activation methods in working with a young child; determine the role of socialization and socialization of the child; apply developmental psycholinguistics, shape the development of a child's speech and language; determine the role of supporting intellectual development, early learning to read in the norm and pathology, the risk of dyslexia, its diagnosis and therapy; plan and apply pedagogical methods in early support of child development, methods of augmentative and alternative communication (AAC) and the basics of sign language; determine the role of the computer, media and new technologies in supporting child development; analyze the organization of care and upbringing of a young child in Poland; determine the organization, models and standards of early support of child development and early therapeutic intervention	identifies the etiopathogenesis of sensory development disorders; identifies and analyzes types of sensory development disorders; plans support in this area	[SU4] test/exam - oral or written

	Course outcome	Subject outcome	Method of verification
	[E.1WW.W.2] has in-depth knowledge and understanding of the psychological and pedagogical foundations of early child development support and early therapeutic intervention; basics of neuropsychology; developmental psychology, including prenatal psychology; etiopathogenesis of developmental disorders and abnormalities; clinical psychology and psychopathology of a young child; development factors and the educational environment of a young child; the issue of disability and the risk of disability; types of disabilities in children and neurodevelopmental disorders, cerebral palsy, autism spectrum disorders, ADHD and language disorders; the issues of emotional and behavioral disorders in children, psychohygiene, prevention and early recognition of developmental disorders; principles of care and nurturing of a young child, psychoeducation and psychopedagogical support for parents or guardians of a child with developmental risks; principles of conducting training in educational skills; the role of play and activating methods in working with a young child; the role of socialization and socialization of the child; developmental psycholinguistics; the issue of shaping the child's speech and language, early learning to read in the norm and pathology, the risk of dyslexia, including its diagnosis and therapy; pedagogical methods in early support of child development; the role of supporting intellectual development; methods of augmentative and alternative communication (AAC); basics of sign language; the role of the computer, media and new technologies in supporting child development; principles of organizing care and upbringing of a young child in Poland; principles of organization, models	knows theories about sensory development; defines disorders in this sphere; identifies specific sensory difficulties in children with specific disabilities	[SW4] test/exam - oral or written
