

**Subject card**

<b>Subject name and code</b>	Safety od Web Applications, PG_00204172						
<b>Field of study</b>	Informatics						
<b>Date of commencement of studies</b>	October 2026	<b>Academic year of realisation of subject</b>			2027/2028		
<b>Education level</b>	Bachelor's studies	<b>Subject group</b>			Obligatory subject group in the field of study Subject group related to practical vocational preparation		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	2	<b>Language of instruction</b>			Polish		
<b>Semester of study</b>	4	<b>ECTS credits</b>			2.0		
<b>Learning profile</b>	practical	<b>Assessment form</b>			credit		
<b>Conducting unit</b>	Institute of Informatics -> Faculty of Mathematics, Physics and Informatics -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr Jakub Neumann				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	30		0.0		20.0	50
<b>Subject objectives</b>	The aim of the course is to familiarize students with issues related to the security of web applications, including how to properly design applications in terms of security, the use of dedicated/specialized protocols and counteracting popular attacks. Particular emphasis is placed on OAuth2/OpenIDConnect protocols and the issue of secure API sharing						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[INFPL3_K02] is ready to recognize the importance of knowledge in solving cognitive problems and practical and seeking opinions experts in case of difficulties with independent problem solving	can precisely formulate questions related to the security of web applications and OAuth2/ OpenIDConnect protocols, in particular use concepts such as Resource Server, Authorization Server, Resource Owner, Client, User Agent	[SK2] presentation/project/paper/report [SK4] test/exam - oral or written
	[INFPL3_W07] knows and understands facts and methods to an advanced degree in the field of designing, developing, testing, implementing and maintaining web applications and their security; applies this knowledge in practical projects, creating web applications and preparing their functional and performance tests	has knowledge related to web application security issues, counteracting popular attacks, in particular knows the rules related to flows/grants of the OAuth2/ OpenIDConnect protocols	[SW4] test/exam - oral or written [SW2] presentation/project/paper/report
	[INFPL3_U06] can take care of data security, including secure transmission; uses data compression and encryption tools	can safely serve APIs following the rules of OAuth2 flows/grants, use appropriate libraries to support OAuth2, manage the Keycloak authorization server	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
	[INFPL3_U03] is able to cooperate with other people within teamwork, including being able to manage his/her time, make commitments, communicate using various techniques in the professional environment, including the use of dedicated tools; is able to present different opinions and alternative technical solutions in the project team, explaining their basis, consequences and impact on the project implementation	is able to keep commitments, including time deadline, resulting from the implementation of project tasks, cooperate in a group carrying out similar projects/tasks	[SU2] presentation/project/paper/report [SU4] test/exam - oral or written
Subject contents	<ul style="list-style-type: none"> <li>• Authentication, authorization, IT system typical security issues</li> <li>• HTTP protocol security, the role of the TLS protocol, securing the shared HTTP API</li> <li>• HTTP Basic Authorization</li> <li>• protocols OAuth2, Authorization Code Flow/Grant, Client Credential Flow/Grant, OpenID Connect</li> <li>• configuration of authentication and authorization services on the example of the Auth0/Okta website</li> <li>• local authentication and authorization service based on the example of the Keycloak server</li> </ul>		
Prerequisites and co-requisites	Passed course "Protokoły sieci web"		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	tests	51.0%	60.0%
	projects	51.0%	40.0%
