

**Subject card**

<b>Subject name and code</b>	AI in Academic Education, PG_00188315						
<b>Field of study</b>	Medical Physics						
<b>Date of commencement of studies</b>	October 2026	<b>Academic year of realisation of subject</b>				2026/2027	
<b>Education level</b>	Bachelor's studies	<b>Subject group</b>				Obligatory subject group in the field of study	
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>				e-learning	
<b>Year of study</b>	1	<b>Language of instruction</b>				Polish	
<b>Semester of study</b>	1	<b>ECTS credits</b>				0.0	
<b>Learning profile</b>	academic	<b>Assessment form</b>				credit	
<b>Conducting unit</b>	Faculty of Languages -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr hab. Hanna Makurat-Snuzik				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 15.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	15		0.0		5.0	20
<b>Subject objectives</b>	The aim of the course is to provide students with a conscious, critical and practical understanding of the role of artificial intelligence in the modern academic world and to prepare them for the responsible use of AI tools in the process of education, scientific development and future professional career.						
<b>Learning outcomes</b>	<b>Course outcome</b>		<b>Subject outcome</b>			<b>Method of verification</b>	

Subject contents	<p>Introduction. The importance of artificial intelligence in academic education.</p> <p>1. Artificial Intelligence. Major man intelligence. Understanding, awareness, subjectivity. The Turing Test for Modern AI Models.</p> <p>3. History of learning programs. Types of machine learning.</p> <p>4. Natural language processing. How does artificial intelligence read, generate and translate texts? Prompting techniques as support in the academic education process.</p> <p>5. Artificial intelligence as a set of tools supporting self-development and learning. A suite of artificial intelligence applications and tools for students.</p> <p>6. The importance of writing for the development of science. The condition of writing and text created by humans in the era of generative artificial intelligence. Authorship of the text. AI-generated content in the context of copyright law.</p> <p>7. The potential and threats related to the use of artificial intelligence in the process of preparing diploma theses, texts and academic projects.</p> <p>8. Legal framework for the design and use of artificial intelligence. AI Act. White Paper. UNESCO recommendations. Institutional codes.</p> <p>9. GDPR and the right to privacy in the era of artificial intelligence in the context of the AI Act.</p> <p>10. The idea of trustworthy artificial intelligence. "Hallucinations" of artificial intelligence models. The idea of transparency in the face of disinformation and manipulation using AI systems.</p> <p>11. Ethical foundations for the development and use of artificial intelligence. Ethical standards for the use of AI tools in force at the University of Gdańsk.</p> <p>12. Humanity as a superior value in the era of artificial intelligence. The likelihood of an existential threat related to the uncontrolled development of artificial intelligence systems. Human-centric approach and protection of human freedom as the primary goal of ethical and legal norms in the context of the development of uncontrolled artificial intelligence.</p> <p>13. Superintelligence, i.e. general artificial intelligence. Paths of development, potential and cognitive superpowers. Ethical consequences of creating superintelligence.</p> <p>14. Education in the era of artificial intelligence. Developing competences in the field of artificial intelligence. Developing human competences.</p> <p>15. Consciously shaping your professional career in the era of artificial intelligence. Understanding the ongoing changes in the labor market in the context of the development of AI technology.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	test	51.0%	50.0%
	practical tasks	51.0%	50.0%
Recommended reading	Basic literature
