

Subject card

Subject name and code	Reproductive and Developmental Biology of Marine Invertebrates - laboratory , PG_00204911						
Field of study	Oceanography						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			2.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Department of Marine Ecosystems Functioning -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Luiza Bielecka				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
	Additional information: laboratory exercises						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	Familiarizing students with the basic concepts of reproduction and development of marine invertebrates, the diversity and complexity of their development cycles and the methodology of biological (population) analyses. Acquiring the ability to describe the development cycles of marine invertebrates, including environmental conditions that may affect them.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OCEANMU2-W01] knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish and a selected foreign language)	Knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish, English and/or Latin) with particular emphasis on the reproduction and development of marine invertebrates	[SW4] test/exam - oral or written [SW1] oral statement/ conversation/discussion [SW2] presentation/project/paper/ report
	[OCEANMU2-U04] is ready to develop in an analytical and synthetic way research and analysis results and based on them creating conclusions	Is ready to develop in an analytical and synthetic way research and analysis results regarding the reproduction and development of marine invertebrates and based on them creating conclusions	[SU8] observation of student's independent or team work
	[OCEANMU2-U02] is able to fluently and accurately use scientific terminology when presenting and discussing oceanographic issues, and to propose and justify innovative solutions	Can use scientific terminology fluently and appropriately in presenting and discussing problems in the field of reproduction and development of marine invertebrates	[SU1] oral statement/conversation/ discussion [SU2] presentation/project/paper/ report [SU4] test/exam - oral or written
[OCEANMU2-K05] is ready to follow the rules occupational health and safety, taking care of the entrusted person specialized and recognition equipment emergency situations and take appropriate action activities	Is ready to follow the rules occupational health and safety, taking care of the entrusted person specialized and recognition equipment emergency situations	[SK8] observation of student's independent or team work	
Subject contents	Life cycles of selected taxonomic groups of marine invertebrates, with particular emphasis on the fauna of the Baltic Sea - the importance of the complexity of life cycles and the impact of the environment on the quality of marine invertebrate populations. Microscopic analysis of developmental stages of selected marine invertebrates - identification of animals based on specific diagnostic features, assignment to particular taxonomic groups.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	student's work during laboratory classes	51.0%	35.0%
	test	51.0%	50.0%
	presentation	51.0%	15.0%
