

Subject card

Subject name and code	Marine Mammals - Biology and Management - lecture, PG_00204924						
Field of study	Oceanography						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2026/2027		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			1.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Iwona Pawliczka Vel Pawlik				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	<p>Learning life strategies related to the challenges of the marine environment, including feeding, communication and reproduction.</p> <p>Familiarization with the ecological role of marine mammals in aquatic ecosystems.</p> <p>Presentation of the importance of health condition in the survival of marine mammals in the face of the challenges of the aquatic environment.</p> <p>Familiarization with conservation conflicts in population management, the importance of knowledge about species and modern research methods for the effective management of human activities in the protection of marine mammals and their habitats.</p>						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OCEANMU2-U02] is able to fluently and accurately use scientific terminology when presenting and discussing oceanographic issues, and to propose and justify innovative solutions	the student is able to fluently and appropriately use current scientific terminology in presenting and discussing problems in the field of marine mammals	[SU4] test/exam - oral or written
	[OCEANMU2-W01] knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish and a selected foreign language)	the student knows and understands in-depth specialist terminology relevant to marine mammal science	[SW4] test/exam - oral or written
	[OCEANMU2-W06] knows and identifies potential threats to the marine environment on a local and global scale resulting from strong anthropopressure, predicts their effects on various time and space scales	the student knows and identifies potential threats resulting from strong anthropopressure for marine mammals, especially in coastal areas of seas and oceans, and knows and understands the impact of human activities on the condition of marine ecosystems, knows the benefits of using its resources	[SW4] test/exam - oral or written
[OCEANMU2-W07] knows and understands legal regulations, principles of sustainable development of the marine environment, its protection and management of the marine environment and its resources	the student knows and understands the regulations and terminology applicable to sustainable marine environment development, with particular emphasis on marine mammals.	[SW4] test/exam - oral or written	
Subject contents	<p>Variety of the degree of adaptation of marine mammals to life in the aquatic environment. Behavioral ecology as a cognitive tool in marine mammal science.</p> <p>Life strategies of marine mammals, i.e. feeding, reproduction, protection against predators, lifespan and mortality, social life.</p> <p>Health condition as a condition for the survival of marine mammals in the marine environment.</p> <p>Parasitism in marine mammals as a pathogenic element and a factor in interactions with humans.</p> <p>The importance of habitat sustainability for marine mammals.</p> <p>Managing the exploitation and conservation of marine mammals as a social process.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	oral or written assessment	51.0%	100.0%

	eResources addresses	
Example issues/ example questions/ tasks being completed	<p>The role of marine mammals in the marine ecosystem. Methods for estimating marine mammal populations. The importance of post-mortem research for marine mammal conservation management. Reproductive strategies of Mysticeti. Types of external parasites of marine mammals and their importance for the health of the hosts.</p>	
Work placement	Not applicable	

Document generated electronically. Does not require a seal or signature.
