

Subject card

Subject name and code	Basics of Scientific Diving - Introduction to the Scientific Diver Course - laboratory, PG_00204949						
Field of study	Oceanography						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			1.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Laboratory of Ichthyology -> Department of Marine Ecology -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Mariusz Sapota				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	15.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		1.0		9.0	25
Subject objectives	Familiarization with the basics of observation methods and underwater documentation						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[OCEANMU2-K01] is ready to plan, implement and supervise, individually or collectively, next stages of the entrusted task, is ready to take responsibility for its results;		is ready to plan tasks related to underwater scientific work in a group		[SK8] observation of student's independent or team work		
	[OCEANMU2-U03] can plan and carry out independently advanced research and measurements, both in field and laboratory, using appropriately selected measurement and analytical techniques in the field of oceanography, adequately to the studied specialty and research problem		can independently plan oceanographic research and measurements using Scuba diving techniques		[SU6] demonstration of practical skills		
	[OCEANMU2-W03] has an in-depth understanding of research methods used in oceanography and related sciences, and interprets their mechanisms and interrelationships across different spatial and temporal scales		knows and understands complex research issues related to direct underwater research		[SW2] presentation/project/paper/report [SW5] implementation of a problem task		

Subject contents	<p>Preparation for underwater observations. Safety rules, equipment description.</p> <p>Tools used during underwater observations. Independently adapt tools suitable for specific observations and environmental work.</p> <p>Design of underwater observation tools depending on the planned research. Independent design and manufacture of tools for underwater observations.</p> <p>Practical application of the analysis of groups of organisms. Determination of species composition, abundance and degree of surface cover on the basis of independently collected samples from the environment.</p>								
Prerequisites and co-requisites									
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="456 562 794 591">Subject passing criteria</th> <th data-bbox="799 562 1137 591">Passing threshold</th> <th data-bbox="1142 562 1481 591">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 598 794 647">assessment of the correctness of the tasks performed</td> <td data-bbox="799 598 1137 647">51.0%</td> <td data-bbox="1142 598 1481 647">100.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	assessment of the correctness of the tasks performed	51.0%	100.0%
Subject passing criteria	Passing threshold	Percentage of the final grade							
assessment of the correctness of the tasks performed	51.0%	100.0%
