

**Subject card**

<b>Subject name and code</b>	Phototransformation of Natural Water Constituents - lecture, PG_00204966						
<b>Field of study</b>	Oceanography						
<b>Date of commencement of studies</b>	October 2026	<b>Academic year of realisation of subject</b>			2026/2027		
<b>Education level</b>	Master's studies	<b>Subject group</b>			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	1	<b>Language of instruction</b>			English		
<b>Semester of study</b>	2	<b>ECTS credits</b>			1.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>			exam		
<b>Conducting unit</b>	Laboratory of Marine Environmental Protection -> Department of Chemical Oceanography and Marine Geology -> Faculty of Oceanography and Geography -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	Subject supervisor		dr hab. Waldemar Grzybowski				
	Teachers						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	<b>Number of study hours</b>	15	1.0		9.0		25
<b>Subject objectives</b>	Familiarization with the influence of solar radiation on substances occurring in the aquatic environment and with methods of examining this influence						
<b>Learning outcomes</b>	<b>Course outcome</b>		<b>Subject outcome</b>		<b>Method of verification</b>		
	[OCEANMU2-W02] knows and understands complex processes and phenomena occurring in the marine environment, with particular emphasis on the coastal zone, as well as complex relationships between living and non-living elements of the aquatic environment		knows the effects of solar radiation on substances found in the aquatic environment		[SW4] test/exam - oral or written		
<b>Subject contents</b>	A. Topics of the lecture A.1 properties of solar radiation A.2 primary photochemical reactions in natural waters A.3 secondary chemical reactions in natural waters, impact secondary reaction products to dissolved substances A.4 mechanisms of creating reactive oxygen species and free radicals						
<b>Prerequisites and co-requisites</b>							
<b>Assessment methods and criteria</b>	<b>Subject passing criteria</b>		<b>Passing threshold</b>		<b>Percentage of the final grade</b>		
	Exam		51.0%		100.0%		
<b>Recommended reading</b>	<b>Basic literature</b>		A. Literature required to finally pass the course (pass the exam): A.1. used during classes A.2. studied independently by the student Zofia Sawicka - Photochemical processes in the environment, 2001, Wydawnictwo UJ, Kraków B.				
	<b>Supplementary literature</b>		Additional literature Pierre Boule (ed.), Environmental Photochemistry Part I (Handbook of Environmental Chemistry), 1999, Springer, Berlin Asa Leifer, The kinetics of environmental aquatic photochemistry, 1988, Oxford University Press, Oxford
