

Subject card

Subject name and code	Master's Thesis Laboratory in Marine and Atmospheric Chemistry II - laboratory, PG_00204985						
Field of study	Oceanography						
Date of commencement of studies	October 2026	Academic year of realisation of subject			2027/2028		
Education level	Master's studies	Subject group			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
Mode of study	full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			6.0		
Learning profile	academic	Assessment form			credit		
Conducting unit	Department of Chemical Oceanography and Marine Geology -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Dominika Saniewska				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	85.0	0.0	0.0	85
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	85		6.0		59.0	150
Subject objectives	Carrying out research tasks related to the completion of a master's thesis; preparing and editing thesis manuscripts.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OCEANMU2-K03] is ready to effectively organize his/her own work, is active and persistent and punctuality in completing tasks, is ready to carrying out evaluation of their own activities	Ready to effectively organize his own work in the laboratory and during field research, shows initiative, perseverance, and timeliness in performing tasks related to chemical analysis and environmental data processing. He is prepared to critically evaluate his own actions and improve the research procedures used.	[SK8] observation of student's independent or team work
	[OCEANMU2-W05] knows and understands the principles of planning and conducting field and laboratory research as well as advanced methods and tools of scientific research, especially in the field of the studied specialty	Has in-depth knowledge and understanding of the principles of planning and conducting field and laboratory research in chemical oceanography and atmospheric chemistry, as well as advanced methods and tools used in chemical analyses and environmental measurements specific to the field of study.	[SW1] oral statement/ conversation/discussion
	[OCEANMU2-U11] is able to work individually and cooperate in laboratory and field groups, performs various functions in them, including managerial ones, performs various assigned tasks	Able to work independently and effectively collaborate in laboratory and field teams, capable of performing various roles, including coordination or management functions, reliably carries out assigned tasks related to sampling, chemical analysis, and processing results.	[SU2] presentation/project/paper/report [SU8] observation of student's independent or team work
Subject contents	The subject matter of classes and the scope of research, laboratory, field, and literature tasks are determined individually by the student and their thesis supervisor, in accordance with the subject matter and specifications of the thesis. Compilation of research results, their interpretation, and preparation of part of the master's thesis.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	The degree of advancement of research carried out as part of the master's thesis	51.0%	80.0%
	Observation of the student's work	51.0%	20.0%
Recommended reading	Basic literature	The literature is selected for each student individually, in accordance with the guidelines provided by the thesis supervisor.	
	Supplementary literature	The literature is selected for each student individually, in accordance with the guidelines provided by the thesis supervisor.	
	eResources addresses		
Example issues/ example questions/ tasks being completed	Issues relevant to the master's thesis being prepared.		
Work placement	Not applicable
