

**Subject card**

<b>Subject name and code</b>	Management of the Coastal Zone - laboratory, PG_00205012						
<b>Field of study</b>	Oceanography						
<b>Date of commencement of studies</b>	October 2026	<b>Academic year of realisation of subject</b>			2026/2027		
<b>Education level</b>	Master's studies	<b>Subject group</b>			Obligatory subject group in the field of study Optional subject group Subject group related to scientific research in the field of study		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	1	<b>Language of instruction</b>			Polish		
<b>Semester of study</b>	2	<b>ECTS credits</b>			2.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>			credit		
<b>Conducting unit</b>	Faculty of Oceanography and Geography -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr Agnieszka Kubowicz				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	30		2.0		18.0	50
<b>Subject objectives</b>	Knowledge of the basic processes and factors affecting shore and coastal zone development; knowledge of coastal types; human influence on coastal zone development; Integrated Coastal Zone Management strategy and mechanisms, social, economic and environmental objectives.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[OCEANMU2-U05] is able to use source information in Polish and a chosen foreign language, including archival and electronic databases, within the field of oceanography; critically analyzes and synthesizes information, and is capable of performing critical interpretation and synthesis of data	Is able to use scientific resources.	[SU2] presentation/project/paper/report
	[OCEANMU2-W01] knows and understands in-depth specialized terminology used in oceanography and related sciences (in Polish and a selected foreign language)	Is proficient in oceanographic issues, including marine coastal zone processes	[SW2] presentation/project/paper/report
	[OCEANMU2-W02] knows and understands complex processes and phenomena occurring in the marine environment, with particular emphasis on the coastal zone, as well as complex relationships between living and non-living elements of the aquatic environment	understands coastal and marine processes	[SW2] presentation/project/paper/report
	[OCEANMU2-U07] is able to communicate using various communication channels and techniques with specialists and non-specialists in the field of oceanographic issues	Is able to use scientific resources.	[SU2] presentation/project/paper/report
	[OCEANMU2-W06] knows and identifies potential threats to the marine environment on a local and global scale resulting from strong anthropopressure, predicts their effects on various time and space scales	understands coastal processes	[SW2] presentation/project/paper/report
[OCEANMU2-W07] knows and understands legal regulations, principles of sustainable development of the marine environment, its protection and management of the marine environment and its resources	knows the basic law on coastal zone management	[SW2] presentation/project/paper/report	
Subject contents	<p>Characterisation of processes and factors influencing coastal development. Classification of sea and ocean shores, division of the coastal zone. Human influence on coastal development, coastal zone, methods of coastal protection, rationale for coastal protection. Projections of coastal evolution in the light of global climate change, potential threats. Problems of coastal management. Social, economic and environmental goals of sustainable development. Organisation of the implementation of ICZM programmes. Coastal resources in the context of management, resource assessment. Management programmes for selected coastal areas. National and world experience in coastal area management, taking into account areas with extraordinary risks.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	presentation/project/report	51.0%	100.0%
