

Subject card

Subject name and code	Introduction to Behavioral Therapy, PG_00208098						
Field of study	Special Pedagogy						
Date of commencement of studies	October 2026		Academic year of realisation of subject			2029/2030	
Education level	uniform Master's studies		Subject group			Obligatory subject group in the field of study Optional subject group	
Mode of study	full-time studies		Mode of delivery			at the university	
Year of study	4		Language of instruction			Polish	
Semester of study	7		ECTS credits			3.0	
Learning profile	academic		Assessment form			exam	
Conducting unit	Division of Didactics and Adult Education -> Institute of Education -> Faculty of Social Sciences -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor		dr Kamila Stępień-Rejszel				
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		45.0	75
Subject objectives	nie dotyczy						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[E.1A.U.2] Is able to analyze the psychological and pedagogical bases of knowledge about autism spectrum disorders and preventive and supportive activities; analyze the basics of neuropsychology; identify autism spectrum disorders and other neurodevelopmental disorders, including aphasia, cerebral palsy and ADHD; make a psychological characterization of people with autism spectrum disorders in different developmental periods; recognize early symptoms of autism; determine the physical environment, stimulation and sensory integration in autism; analyze the specificity of cognitive, emotional and social functioning in autism spectrum disorders; analyze the speech, language and communication of people with autism spectrum disorders; carry out a psychopedagogical diagnosis of students with autism spectrum disorders, including functional profiles; use diagnostic methods and tools, with particular emphasis on the international "gold diagnostic standard" ADI-R (Autism Diagnostic Interview-Revised) and ADOS (Autism Diagnostic Observation Schedule); use methods of augmentative and alternative communication (AAC); define the role of the computer, media and new technologies in the therapy of people with autism spectrum disorders; analyze the psychological and pedagogical methods used in autism therapy in the context of evidence-based practice, including ESDM (The Early Start Denver Model); solve educational problems and apply behavior correction in children or students with autism spectrum disorders and present different approaches to the education and therapy of these children and students; describe educational and therapeutic models, selected methods and forms of work and therapy; plan and implement work with parents or guardians of a child or student with autism spectrum disorders, therapeutic support and psychosocial help for the family; define and implement support for a person with autism spectrum disorders in adult life and identify employment problems for these people	The student is able to analyze the psychological and pedagogical foundations of knowledge about autism spectrum disorders and preventive and supportive activities; analyze the basics of neuropsychology; define autism spectrum disorders and other neurodevelopmental disorders, including aphasia, cerebral palsy and ADHD; make a psychological characterization of people with autism spectrum disorders in different developmental periods; recognize early symptoms of autism; define the physical environment, stimulation and sensory integration in autism; analyze the specificity of cognitive, emotional and social functioning in autism spectrum disorders; analyze the speech, language and communication of people with autism spectrum disorders; carry out a psychopedagogical diagnosis of students with autism spectrum disorders, including functional profiles; use diagnostic methods and tools, with particular emphasis on the international "gold diagnostic standard" ADI-R (Autism Diagnostic Interview-Revised) and ADOS (Autism Diagnostic Observation Schedule); use methods of augmentative and alternative communication (AAC); define the role of the computer, media and new technologies in the therapy of people with autism spectrum disorders; analyze the psychological and pedagogical methods used in autism therapy in the context of evidence-based practice, including ESDM (The Early Start Denver Model); solve educational problems and apply behavior correction in children or students with autism spectrum disorders and present different approaches to the education and therapy of these children and students; describe educational and therapeutic models, selected methods and forms of work and therapy; plan and implement work with parents or guardians of a child or student with autism spectrum disorders, therapeutic support and psychosocial help for the family; define and implement support for a person with autism spectrum disorders in adult life and identify employment problems for these people	[SU1] oral statement/conversation/discussion [SU4] test/exam - oral or written

	Course outcome	Subject outcome	Method of verification
	[E.1A.W.1] has in-depth knowledge and understanding of the medical basis of autism spectrum disorders; anatomy and physiology of the nervous system in the context of developmental deficits and abnormalities in the autism spectrum and psychosocial conditions for the functioning of people with autism spectrum disorders; issues of genetic disorders and multiple disabilities; basics of psychiatry, psychopathology and neurology; childhood diseases and selected medical problems concerning children with autism spectrum disorders, including diets, supplementation, pharmacotherapy; tools for monitoring the health of children; diagnostic criteria for autism spectrum disorders, their conditions and epidemiology; the place of autistic disorders in medical nosological classifications (ICD, DSM) and functional classification (ICF); principles of differential diagnosis; the issue of autism spectrum disorders in the context of hearing loss, intellectual development disorders and other disorders and disabilities; school functioning of students with autism spectrum disorders and its conditions	The student knows medical basis of autism spectrum disorders; anatomy and physiology of the nervous system in the context of deficits and developmental abnormalities in autism spectrum disorders and psychosocial conditions of functioning of persons with autism spectrum disorders; issues of genetic disorders and associated disabilities; basics of psychiatry, psychopathology and neurology; childhood diseases and selected medical problems concerning children with autism spectrum disorders, including diet, supplementation, pharmacotherapy; tools for monitoring children's health; diagnostic criteria of autism spectrum disorders, their determinants and epidemiology; place of autism spectrum disorders in medical nosological classifications (ICD, DSM) and functional classification (ICF); principles of differential diagnosis; the issue of autism spectrum disorders in the context of hearing impairment, intellectual development disorders and other disorders and disabilities; school functioning of students with autism spectrum disorders and its determinants	[SW4] test/exam - oral or written [SW1] oral statement/ conversation/discussion
	[E.1A.K.2] is ready to use the acquired knowledge to analyze pedagogical events	The student is ready to use the acquired knowledge to analyze pedagogical events	[SK1] oral statement/conversation/ discussion [SK4] test/exam - oral or written
