University of Gdańsk

Subject card

Subject name and code	The Basics of Paleontology - laboratory , PG_00206141						
Field of study	Oceanography						
Date of commencement of studies	October 2027		Academic year of realisation of subject		2028/2029		
Education level	Bachelor's studies		Subject group		Obligatory subject group in the field of study		
Mode of study	full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		2.0		
Learning profile	academic		Assessment form		credit		
Conducting unit	Laboratory of Marine Geology -> Department of Chemical Oceanography and Marine Geology -> Faculty of Oceanography and Geography -> Rector						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Małgorzata Witak, prof. UG					
	Teachers						
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours	Self-study	SUM	
	Number of study hours	30		2.0	18.0	50	
Subject objectives	Ability to macroscopically identify faunal fossils.						

Learning outcomes

Course outcome	Subject outcome	Method of verification
[OCEANL3-U01] is able to use the current scientific terminology in the field of oceanography in various forms of expression	is able to use current scientific terminology in a variety of forms of expression in the field of paleontology	[SU4] test/exam - oral or written
[OCEANL3-U06] is able to formulate and solve advanced problems related to the functioning of individual components of the marine environment, using knowledge from various fields and scientific disciplines	is able to define the basic relationships concerning the functioning of the different components of the marine palaeoenvironment and the fossils associated with it	[SU4] test/exam - oral or written
[OCEANL3-W01] has an advanced knowledge and understanding of the terminology used in oceanography and related exact and natural sciences (in Polish and a selected foreign language)	has an advanced knowledge and understanding of the terminology used in palaeontology	[SW4] test/exam - oral or written
[OCEANL3-W02] has a broad knowledge and understanding of physical, biological, chemical, and geological processes and phenomena occurring in aquatic environments, with particular emphasis on the marine environment	knows and understands the basic physical, biological, chemical and geological processes and phenomena occurring in the aquatic environment, with particular reference to the marine palaeoenvironment, and explains the mechanism of evolution of selected groups of marine invertebrates	[SW4] test/exam - oral or written
[OCEANL3-U03] is able to process, describe, and present results, and draw conclusions	can identify selected types of marine invertebrates	[SU4] test/exam - oral or written
[OCEANL3-U12] is able to systematically expand and update oceanographic knowledge and enhance professional qualifications	is able to systematically extend and update his/her palaeontological knowledge and improve professional qualifications	[SU4] test/exam - oral or written

Subject contents

Identification of the main representatives of marine invertebrate fossils (sponges, brachiopods, trilobites, gastropods, bivalves, cephalopods, lilyfish, sea urchins, graptolites)

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Test I	51.0%	50.0%
Test II	51.0%	50.0%

eResources addresses	

Example issues/ example questions/ tasks being completed

1. Describe the developmental trends of graptolites

2. Identify the major guide fossils in the Mesozoic

3. Identify fossils of rock-forming and palaeoecological importance in the late Palaeozoic
