Subject objectives

Developing knowledge on methods of inventory and natural valorization of coastal and marine areas, predicting the effects of human impact on the functioning of marine biotopes, and search for solutions to reduce the negative impact of the of the planned project on the marine environment

Learning outcomes

Course outcome	Subject outcome	Method of verification
[OCEANL3-W05] has an advanced knowledge of techniques, research methods, and tools (mathematical, statistical, and computational) used by oceanographers to describe and interpret processes and phenomena occurring in the marine environment	Has advanced knowledge of research techniques and methods used to inventory and valorize the natural components of the marine environment	[SW4] test/exam - oral or written
[OCEANL3-W06] has an advanced understanding of the principles of managing the marine environment and its resources, as well as the consequences of disrupting the balance of marine ecosystems	Has advanced knowledge of the principles of biotic resource management and the consequences of marine ecosystem imbalance	[SW4] test/exam - oral or written
