[SK4] test/exam - oral or written

<table>
<tr><td>Subject contents</td><td>1. Elements of the methodology of science: the ambiguity of the term "science", the characteristics of scientific knowledge (goal, object, method), science and other spheres of culture (ordinary knowledge, philosophy, religion, ideology, wisdom), science and quasi-scientific fields (protoscience, pseudoscience, parascience). 2. Elements of the philosophy of science: the main problems of the philosophy of science, contemporary positions: inductivism, falsificationism/critical rationalism, relativism, methodological anarchism, realism/anti-realism. 3. Ethics: the specificity of the field (descriptive ethics and normative ethics, branches of ethics, naturalistic fallacy, moral dilemmas, moral norms and the norm of morality, models of practical ethics), the main ethical theories and their conceptual tools (utilitarianism/consequentialism, Kantianism/deontologism, virtue ethics, value ethics, personalism). 4. Ethics in science: axiology of science, ethics of scientific research, moral consequences of practicing science, aretology in science, codes of ethics in science.</td></tr>
