

**Subject card**

<b>Subject name and code</b>	New technologies law , PG_00072784						
<b>Field of study</b>	Environmental Law and Sustainable Development						
<b>Date of commencement of studies</b>	October 2024	<b>Academic year of realisation of subject</b>			2025/2026		
<b>Education level</b>	Master's studies	<b>Subject group</b>			Obligatory subject group in the field of study		
<b>Mode of study</b>	full-time studies	<b>Mode of delivery</b>			at the university		
<b>Year of study</b>	2	<b>Language of instruction</b>			English		
<b>Semester of study</b>	3	<b>ECTS credits</b>			1.0		
<b>Learning profile</b>	academic	<b>Assessment form</b>			credit		
<b>Conducting unit</b>	Centrum Prawa Nowych Technologii -> Faculty of Law and Administration -> Rector						
<b>Name and surname of lecturer (lecturers)</b>	<b>Subject supervisor</b>		dr hab. Jakub Szlachetko				
	<b>Teachers</b>						
<b>Lesson types</b>	<b>Lesson type</b>	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	<b>Number of study hours</b>	0.0	20.0	0.0	0.0	0.0	20
	E-learning hours included: 0.0						
<b>Learning activity and number of study hours</b>	<b>Learning activity</b>	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	<b>Number of study hours</b>	20		2.0		20.0	42
<b>Subject objectives</b>	The aim of the course is to present to the student the issues of new technologies law in the context of environmental protection						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[ELSDMU2_U03] The graduate is able to perform tasks and formulate and solve problems, using new knowledge in the field of environmental law, as well as in other fields related to environmental law. The graduate is able to independently plan his/her own lifelong learning and guide others in this area. The graduate is able to communicate with diverse circles of recipients and properly justify their positions.	The graduate is able to perform tasks and formulate and solve problems, using new knowledge in the field of new technologies law, as well as in other fields related to environmental law. The graduate is able to independently plan his/her own lifelong learning and guide others in this area. The graduate is able to communicate with diverse audiences and adequately justify their positions	
	[ELSDMU2_K01] Graduates will be capable to facilitate cooperation with other people of different cultures and legal systems, what is necessary for global efforts in the field of environmental protection	Graduates will be able to effectively collaborate with people from different cultures and legal systems, which is essential for the effectiveness of global efforts to protect intellectual property and implement new technology law	
	[ELSDMU2_W07] Student has a structured knowledge of the types of legal relations and the regularities that govern them	has a structured knowledge of the types of legal relations in the area of new technologies law and the regularities that govern them	
	[ELSDMU2_W08] knows methods and tools, including data and information acquisition techniques and research methods, appropriate for legal sciences and other related disciplines, including disciplines from other scientific fields	knows methods and tools, including techniques for obtaining data and information in the area of new technologies law and research methods, appropriate for legal sciences and other related disciplines, including disciplines from other scientific fields, useful in the area of new technologies law	
	[ELSDMU2_W01] The graduate knows and understands in an in-depth way selected facts, theories, methods in the field of legal environmental protection and the complex relationships between them. The graduate knows and understands the diverse, complex conditions and axiological context of the business.	The graduate knows and understands in an in-depth way selected facts, theories, methods in the field of new technologies law and the complex relationships between them. The graduate knows and understands the diverse, complex conditions and axiological context of the use of new technologies	
	[ELSDMU2_W02] The graduate knows and understands to an in-depth degree - selected facts, objects and phenomena as well as methods and theories related to them explaining the complex relationships between them, constituting advanced general knowledge in the field of scientific or artistic disciplines forming the theoretical foundations, structured and theoretically based knowledge covering key issues and selected issues in the field of advanced detailed knowledge - appropriate for the curriculum of the field of Environmental Law and Sustainable Development. The graduate knows and understands the main trends in the development of scientific or artistic disciplines relevant to the curriculum. The graduate knows and understands the main trends in the development of scientific or artistic disciplines relevant to the curriculum.  Wstaw	
	[ELSDMU2_U08] Student can assess the usefulness of typical procedures and good practices for the implementation of complex tasks related to various spheres related to law and related fields	is able to assess the usefulness of typical procedures and good practices for the implementation of complex tasks related to various spheres related to the law of new technologies and related fields	

	Course outcome	Subject outcome	Method of verification
	[ELSDMU2_U04] Graduates have the ability to analyze, apply and interpret relevant norms of international environmental law	The student acquires the ability to analyse, apply and interpret the relevant provisions of the law on new technologies	
	[ELSDMU2_W04] Graduates understand principles and rules referring to using the environment, environmental reclamation of economic activity and legal instruments which introduce those rules and principles.	Graduates understand the rules and regulations of new technology law	
Subject contents	1. Regulating technologies  2. Technology as the regulatory tool  3. Technology as a regulatory target		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	practical exercise, 30 minutes	51.0%	100.0%
Recommended reading	Basic literature	R. Brownsword, K. Yeung Regulating Technologies. Legal Futures, Regulatory Frames and Technological Fixes Oxford 2008  V. Sutton Emerging Technologies Law. Societal Constructs for Regulating Changing Technologies Varrgas Publ. 2021
